"There were so many avenues for research and collaboration that I never expected. I now have a wealth of collaborators which will yield decades of new and exciting projects." Alumni survey 2022

- The academic influence of US-UK Fulbright scholars' publications is higher after the exchange experience than before (by 9%) and stands at 1.74 (i.e. 74% above the global average of 1.0). *Elsevier/Fulbright research project 2023*

- 70% of scholars say their Fulbright experience brought benefits to their home institution - *Alumni survey 2022*

Everyone should have a Fulbright experience. The world would undoubtedly be a better and more tolerant place if they did. My time in the UK transformed my professional and personal life. I am deeply grateful for having had the opportunity.
