MN5424 – CORPORATE FINANCE AND ACCOUNTING IN A GLOBAL CONTEXT

MODULE TYPE/SEMESTER: Core (20 credits), Semester 2

MODULE CO-ORDINATOR: Dr Francois-Regis Puyou

CONTACT DETAILS: frp2@st-andrews.ac.uk

LECTURERS: Francois-Regis Puyou & Louis Nguyen (ddn2)

AIM: The module will introduce students to the fundamental concepts of accounting and finance, and will enable them to understand the different functions they provide within the global business world.

OBJECTIVES: As prospective business managers, students should appreciate that accounting and finance will be a significant part of the management function and this module will give them an insight into the language used by accounting and finance professionals and the ability to express the accounting and finance support they may require as managers. The course will provide an informative introduction to the most important accounting statements, the roles of the accountant and financial analyst in the organisation, as well as the functions of accounting and financial management of the corporation.

METHOD OF TEACHING AND LEARNING: One two hour lecture each week, plus one hour tutorial each week.

LEARNING OUTCOMES: By the end of the module, students should be able to:

1. Understand the role of accounting and finance in the organisation.
2. Recognise and use basic accounting statements.
3. Use accounting ratios for investment and management decisions.
4. Understand the time value of money and Discounted Cash Flow Valuation
5. Evaluate investment decisions using Net Present Value and other investment rules.
6. Appreciate the relationship between risk and return.
7. Calculate the firm’s cost of capital, and understand what it means to the firm and its investors.
8. Understand investment and financing decisions in an international context.
