Event /Course Title	The 6 th Edinburgh Clinical Research Methodology Course
Date of event	23 rd and 24 th of April 2018

1. Brief description of Event (50-100 words): The objective of this two-day course is to provide a comprehensive overview of the methods and frameworks currently required to perform cutting-edge clinical research.

2. What were the benefits of attending and what did you gain from the experience in terms of transferable skills and knowledge: This course helped me to develop my knowledge in clinical research. I had the opportunity to see and learn the different but very important aspects of clinical research, the complexity of the field and learn from the experts of this scientific area.

3. What actions will you be taking as a result of attending or by making new networking contacts: I will be more careful when it comes to design a clinical trial and will be using all the useful tips I learned on the course. I would pay more attention to ask the proper research questions and will have more knowledge in how to write a successful grant proposal. I learnt how papers should be written to get them published in high impact factor journals, which is an important skill that I am going to use in my career.

4. Can you share any additional resources produced in connection with the event (e.g. feedback from participants, training resources, website links, and additional materials. No.

5. Tips/experience learned from the event: Before the course, I did not realize how important networking and public engagement activities were. I learned about their role in research on the course.

6. Any additional comments or information regarding the event
