1. Brief description of Event (50-100 words): A geosciences conference surrounding a wide range of topics including atmosphere, geology, hydrology etc. taking place on a yearly basis in Vienna. The presentation is open to scientists of all nations and is an exciting opportunity to listen to talks, presentations and network.

2. What were the benefits of attending and what did you gain from the experience in terms of transferable skills and knowledge. It was a great opportunity to present some of my own research and hear about the research other people were completing. Networking and meeting people from a wide range of disciplines was incredibly useful, and great to have these contacts for future work.

3. What actions will you be taking as a result of attending or by making new networking contacts. I was able to email and contact a variety of people subsequent to out conversations at EGU about both work I was currently completing and details of future work. I look forward to contacting these people again in the future.

4. Can you share any additional resources produced in connection with the event (e.g. feedback from participants, training resources, website links, and additional materials).

5. Tips/experience learned from the event

If you are interested in a career in research, conferences are key to connecting with other people in your field of interest and in other fields!

6. Any additional comments or information regarding the event
