A-CSEAR 2016

Emerging Scholar’s Colloquium

Building sustainable connections

CSEAR 2016 is organising a one day Emerging Scholars’ Colloquium in Social and Environmental Accounting (SEA) research. Prior Colloquia have been very well attended and created strong research relationships between new and emerging scholars in the discipline.

In keeping with this focus on creating informal, collaborative and productive research relationships, the CSEAR 2016 Emerging Scholars’ Colloquium will aim to:

1) Provide a platform for networking between emerging scholars’ and experienced researchers;
2) Create a forum for in-depth feedback from mentors and other research students on submitted research outlines; and,
3) Serve as a training ground for building important skills in SEA research.

The Colloquium will consist of a range of networking opportunities, close group discussions and plenary sessions. The Colloquium will conclude with a reflection on the state of play in SEA research by a panel of experienced researchers.

Selection criteria for applications

As the focus of the Colloquium will be on cultivating intensive research discussions, limited spaces will be available for PhD students and Early Career Researchers (within the first 5 years of PhD completion).

Applications should be no longer than 1500 words in length. Each application should outline aims of the research study, a concise indication of relevant literature, methodological and theoretical approach(es) adopted, any findings/analysis together with potential research contributions. Please also indicate the challenges faced in the research process to date and any specific questions/feedback required. Applications will be considered on:

1) The quality of the research outline and fit into the discipline of Social and Environmental Accounting;
2) Theoretical and methodological diversity as well as contribution to the field;
3) Stage of research completion with preference given to candidates who have had their PhD proposal accepted or Early Career Researchers who are yet to publish from their PhD research.

However, at all times, the Colloquium committee will engender an inclusive and open-minded approach to assessing applications. As such, a wide variety of applications are encouraged.

Please email submissions to sanjaya.kuruppu@unisa.edu.au by 12:00 p.m. (Adelaide time) on 4th September 2016 with the email subject “CSEAR Emerging Scholars’ Colloquium”.

We look forward to welcoming you to Adelaide!
