Foraminifera in a Changing World
International Symposium on Foraminifera
June 17 – 22, 2018
Edinburgh, Scotland, UK

The Organising Committee is pleased to announce the next International Symposium on Foraminifera, FORAMS 2018.

We welcome papers investigating the impacts of our changing world on foraminifera. We seek contributions ranging from foraminiferal biology, evolutionary and population dynamics to molecular works on single-cell genomics and environmental genomics. We also invite papers discussing the impacts of our changing world on forams geochemical and biomineralisation responses to multi-stressor events and biogeographical perturbation. We encourage papers incorporating all aspects of applied micropalaeontology, for biomonitoring and industry. The symposium will also celebrate the 50th year anniversary of ocean drilling (IODP), and the history of foraminiferal research featuring the role of micropalaeontological schools with two dedicated sessions.

FORAMS 2018 will also host the TMS Spring Foram & Nanno Group Meeting on Friday, 22 June 2018. Participants are invited to pre-register for the meeting by sending an email to forams2018@st-andrews.ac.uk with the subject title: pre-registration-name.

FORAMS 2018 specialist workshops will follow the congress and will be hosted at the nearby coastal town of St Andrews. If you would like to run a workshop, please submit your proposal by sending an email to forams2018@st-andrews.ac.uk with the subject title: workshop proposal-name.

More details of the symposium, social events and linked workshops will be available at: www.tmsoc.org/forams-2018

Organising Committee:
• Bill Austin (UK)
• Kate Darling (UK)
• Martin Langer (Germany)
• Silvia Spezzaferri (Switzerland)
• Elena Lo Giudice Cappelli (UK)

Scientific Committee:
• Silvia Spezzaferri (chair) • Sue Goldstein • Joan Bernhard • Howie Spero • Jelle Bijma • Jonathan Erez • Lennart de Nooijer • Takashi Toyofuku • Frans Jorissen • Joachim Schoenfeld • Pamela Hallock Muller • Martin Langer • Kate Darling • Magali Schweizer • Jan Pawlowski • Raphael Morard • Andy Purvis • Tom Ezard • Brian Huber • Paul Pearson • Dick Kroon • Ellen Thomas • Daniela Schmidt • Karen Luise Knudsen • Helena Filipsson • Michal Kucera • G-J Brummer • John Gregory • Haydon Bailey • Elizabeth Alve • Bill Austin • Sigal Abramovitch • Petra Heinz • Hiroshi Kitazato • Emmanuelle Geslin
