1. Open System Preferences and select Networks.
2. In the left-hand panel, select Wi-Fi.
3. Click the Turn Wi-Fi On button.
4. Select uos-connect from the dropdown list.
5. Open a web browser.
6. Go to http://connect.st-andrews.ac.uk, where you will be redirected to the eduroam setup page.
7. In the ‘eduroam for University of St Andrews users’ section, click on the Go to eduroam setup button.
8. Enter your St Andrews username and password then click Log in. A new window will open.
9. Click Continue. A new window will open.
10. Enter your St Andrews password then click Next. A new window will open.
11. You may be asked for your Mac admin password. If so, please enter it and click OK.
12. A new windows will open verifying that the eduroam profile has been installed successfully.
13. Remove uos-connect from the list of known networks. To do so, open System Preferences, select Networks then Advanced and find the network name. Highlight it and choose the ‘-’ button to remove it.
14. Quit System Preferences.
15. The eduroam wireless network connection can now be selected from the Wi-Fi menu.
16. If you subsequently connect to a wired eduroam network, the first time you connect you will be prompted to select a configuration. A new window will open.
17. Select Wired 802.1X (eduroam) from the dropdown list then click Connect.
