1. In the Taskbar, click on the Wireless Network icon. You may have to switch on wireless networking on your device to enable this feature.

2. A new window will open showing the wireless connections that are available. Select uos-connect from the list of available networks and click Connect.

3. Open a web browser. You should be re-directed to the eduroam landing page. If not, open a web page such as http://www.st-andrews.ac.uk. Click on the Go to eduroam setup button.

4. A Windows Security login window will open. Enter your St Andrews username and password then click OK. A new window will open.

5. Click the Download eduroam Profile Installer button. You will be asked to Run and Save the installation file. Click both buttons. A new window will open.

6. Click Install to add the eduroam installer.

7. When the installation is complete a new window will open. Click the Finish button to complete the installation.

9. Connect to eduroam. Select eduroam from the list of available Wireless Network Connections. When prompted for username and password, please enter your St Andrews username followed by @st-andrews.ac.uk.

10. If an eduroam certificate window appears, click Connect. Confirm your connection by clicking the Wireless networks icon in the Taskbar.
