1. In the **Taskbar**, click on the Wireless Network icon. You may have to switch on wireless networking on your device to enable this feature.

2. A new window will open showing the wireless connections that are available. Select **uos-connect** from the list of available networks.

3. Open a web browser. You should be re-directed to the eduroam landing page. If not, open a web page such as [http://www.st-andrews.ac.uk](http://www.st-andrews.ac.uk). Click on the **Go to eduroam setup** button.

4. A Windows Security login window will open. Enter your St Andrews **username** and **password** then click OK. A new window will open.

5. Click the **Download eduroam Profile Installer** button. You will be asked to **Run** and **Save** the installation file. Click both buttons. A new window will open.

6. Click **Install** to add the **eduroam** installer.

7. When the installation is complete a new window will open. Click the **Finish** button.

9. Connect to eduroam. Select **eduroam** from the list of available Wireless Network Connections.

10. When prompted for **username** and **password**, please enter your St Andrews username followed by @st-andrews.ac.uk.

11. Confirm your eduroam connection by clicking the Wireless networks icon in the **Taskbar**.
