1. In Settings > Wi-Fi, select **uos-connect**.

2. Open a web browser and go to http://connect.st-andrews.ac.uk. You will be redirected to the Network Setup page. Select Go to eduroam setup.

3. You will be asked for your University username and password. Select Log In.

4. Download the eduroam profile. Select Install when prompted.

5. You will be asked to enter your University password one more time.

6. You should now be connected to eduroam. Open a web page (e.g. http://www.st-andrews.ac.uk) to check if you are connected. We advise that you select eduroam as your preferred wireless connection in settings > Wi-Fi.

7. Remove **uos-connect** from the list of known networks. To do this, open **Settings** then **Wi-Fi** and choose the icon beside the network name. Select **forget this network**.
