This module seeks to provide the kind of sophisticated theoretical and research skills training now regarded as indispensable for all postgraduates. It has both theoretical and methodological orientation and aims at teaching the students to correlate adequately conceptual frameworks and research designs. Its aim are to (a) debate and enrich our common concepts of reading and analyzing cinematic texts and contexts, by providing a range of different perspectives on film theory and methodology of criticism and various approaches to cinematic research, and (b) offer high-quality training related to methodology which stresses various aspects of conceiving, pursuing, organising, and successfully completing research projects in film studies.

**Programme module type:** Compulsory for Film Studies Postgraduate Programme.

Colonial Cinema will examine the integral role that cinema played in the control, organisation and governance of the British Empire. Exploring transnational developments in cinema, it assesses early filmmaking, distribution and exhibition practices in, for example, Africa, India, and Malaya. The module offers students a new way of examining film history, from the emergence of film in the late 19th century to the establishment of local film cultures in colonial and post-colonial territories. Colonial Cinema addresses pedagogical uses of cinema and non-theatrical forms of exhibition (for example, mobile cinema circuits), encouraging students to engage critically with primary archival material, government reports and, in particular, a new online resource for colonial film, Colonial Film: Moving Images of the British Empire.

Programme module type: Optional for Film Studies Postgraduate Programme.

This module, together with PY5102 in semester 2, covers recent work in four central areas of philosophy, each of them in a section of 11 hours. The four areas are Epistemology, Ethics, Philosophy of Language and Philosophy of Mind. Two of these will be covered in PY5101, the other two will be covered in PY5102. The Epistemology section will include topics from among the following: justification; causal, tracking and reliability conditions for knowledge; the a priori; virtue epistemology; contextualism; internalism and externalism, the status of epistemology itself. The Ethics section will include topics from among the following: consequentialism, deontology, moral pluralism; double effect and/or the distinction between acts and omissions; the nature of moral justification, critiques and defences of impartial moral theory, questions in meta-ethics. The Philosophy of Language section will include topics from among the following: how words come to have content, the relation between use, meaning and saying, the relation between meaning, truth, and reference. The Philosophy of Mind section will include topics from among the following: the relation between the mental and the physical; mental causation; rationalising explanation; the normative dimension of mentality, personhood.

This is an introduction to the methods and practice of research in philosophy. It will be run as a book seminar, with students presenting and discussing chapters or sections of a major work chosen to be accessible and challenging for MLitt students whatever their individual interests in philosophy. The module will provide the experience of philosophising together: vital for philosophical development but liable to take second place in standard taught modules; it will also leave students better prepared to undertake larger and more autonomous research projects, beginning with the 15,000 word MLitt dissertation.

**Programme module type:** Compulsory for Epistemology, History of Philosophy, Logic and Metaphysics, Mind and Language, Moral, Political and Legal Philosophy and Philosophy Postgraduate Programmes.

**Learning and teaching methods and delivery:** Weekly contact: 2 hours.

**SCQF Level:**
11

**Semester:**
1

**Planned timetable:**
To be arranged.

The object of this module is to provide a sound understanding of some important turning points in the development of the 'analytic' strand in 20th century philosophy, and of some of its 19th century roots. The course has two main themes. The first deals with philosopher-mathematicians such as Poincaré and Hilbert who influenced the analytic tradition's epistemology and philosophy of logic. The second deals with developments in logic and its philosophy stemming from the work of Frege and Russell's and Wittgenstein's early work in Cambridge.

This module begins with elementary aspects of the theory of cardinality, concentrating on equinumerosity and denumerability. The next topic is computability, focusing on two apparently quite different characterisations of this notion: computability by Turing machines and recursive functions. Fairly complete proofs of their equivalence are given. (Ultimately, we need this notion to give exact sense to the notion of a formal system.) This material serves as background to the remainder of the module which establishes the famous limitative results of Gödel (incompleteness of arithmetic), Tarski (non-definability of arithmetic truth), and Church (undecidability of first-order logic). To obtain these results we must show that the recursive functions are representable in a formal theory of the arithmetic of the natural numbers.

This module will focus on liberalism and its critics. We will examine liberalism's central features and explore the variety of liberal theories (from minimal-state 'classical liberalism' to 'welfare capitalism'). Criticisms of liberalism take many forms, and initially we shall investigate the contemporary communitarian critique of liberalism. If time permits we may also look at some feminist theories which are critical of both liberalism and communitarianism.

### SA5010 Research Methods in Social Anthropology

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>30</th>
<th>SCQF Level</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Planned timetable:** 11.00 am Wed

This module aims to examine the methodology of anthropological research through close attention to the relationship between method and fieldwork experience. In particular, students are led into readings of fieldwork diaries, journals and letters, and invited to consider the experience of fieldwork and anthropological research in the round [i.e. not just as methodology for data collection]. A core focus is on what else about fieldwork experience and anthropological research practice we can learn from looking at diaries and letters rather than just at published ethnographic monographs.

**Programme module type:**
- Compulsory for MPhil Postgraduate Programmes in Social Anthropology and Social Anthropology (including Amerindian Studies).

**Learning and teaching methods and delivery:**
- **Weekly contact:** 1 lecture, 1 seminar.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** Dr A Reed

**Lecturer(s)/Tutor(s):** Dr A Reed
### SA5011 The Anthropology of Connections: Interdisciplinarity as Methodology

**Planned timetable:** To be arranged.

This module builds on SA5010 by examining the relevance of other disciplines for Social Anthropology. Through lectures and seminars, students are shown how Anthropology can be extended and illuminated by working with methodologies and concepts drawn from History, Social Science, Philosophy, Language and the Arts. It shows how anthropologists must invoke other specialist disciplines during their work. It invites students to think of societies and anthropological theories as informed by internal and external constraints, dialogues and reinterpretations, which unfold in time. It will show the role of anthropology in articulating different disciplines.

**Programme module type:** Compulsory for MRes in Social Anthropology, and in Social Anthropology (including Amerindian Studies) Postgraduate Programmes. Compulsory for MPhil Postgraduate Programmes in Social Anthropology and Social Anthropology (including Amerindian Studies).

**Learning and teaching methods and delivery:** Weekly contact: 1 lecture, 1 seminar.

**Assessment pattern:** Coursework = 100%

**Planned timetable:** To be arranged.

This module centres on the role of perception in visual and material culture. It covers haptic, visual, sonic and gustatory themes in anthropology, including learning, apprenticeship, craft, community and cooperation, observation, the use of drawing and photography as research tools, design anthropology and aesthetics. It explores commonalities between anthropological fieldwork and contemporary arts practice.

It specifically addresses the relationship between anthropology, psychology and aesthetics; and the observer and the practitioner. The taught course is complemented by practical sessions; visiting speakers; films; and by case studies reflecting departmental research concerns with both Scottish anthropology and the interconnectedness of global art practices.

**Programme module type:** Compulsory for MRes in Anthropology, Art and Perception Postgraduate Programme.

**Learning and teaching methods and delivery:** Weekly contact: 2 lectures per week and occasional practicals and film/video viewing.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** Dr S Bunn

**Lecturer(s)/Tutor(s):** Dr S Bunn

This module continues the programme’s sensory exploration across the anthropology of art and material culture, especially focusing on the visual, the local and global. It draws on the meeting points between film and science, and art, heritage and museum ethnography to develop new ways of thinking anthropologically about visual and material culture.

Themes include: a use of photography and archival imagery as research sources and tools; film as art and science; diasporic aesthetics; the use of new media tools such as U-Tube and Podcasts in research; and perceiving the past through material culture.

The teaching is complemented by practical sessions; visiting speakers; museum and other field trips; films; and by case studies reflecting departmental research concerns with both Scottish anthropology and the interconnectedness of global art practices.

### SA5521 Case-studies in Anthropology, Indigenous Peoples and Resource Extraction

<table>

**Planned timetable:** To be arranged.

Subsurface minerals and other natural resources are often found on land occupied by indigenous peoples. This module has a particular focus on this nexus, examining the social and cultural relations produced by resource extraction projects, and exploring the global and local frames through a series of world-wide case-studies of mining, oil and gas projects. These case-studies are used to examine problems, solutions and the factors making certain agreements and relations more successful and sustainable than others. The aim is to examine the potential for anthropological skills and knowledge to contribute to an industry that has increasingly to account for its social and environmental impacts to a global constituency.

**Programme module type:** Optional for MRes in Social Anthropology and MSc in Sustainable Development Postgraduate Programmes.

**Learning and teaching methods and delivery:**

Weekly contact: 2 seminars.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** Dr T Crook
