Masters in Mathematics

Programme Requirements

Taught Element:
90 credits: 5000-level modules listed in this section of the Postgraduate Course Catalogue.
30 credits: from MT modules in the range MT3000 - MT4598 or MT4600 - MT5998.
Programmes of study are subject to approval by the Head of School.

MSc:
120 credits as for Taught Element together with a 60-credit dissertation (MT5099) comprising three months’ full-time study.

Modules

The Pre-requisites for each module may be replaced by equivalent material from other institutions.

Compulsory module - Whole Year:

<table>
<thead>
<tr>
<th>MT5099 Dissertation for MSc Programme/s</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SCOTCAT Credits:</strong></td>
</tr>
<tr>
<td><strong>Planned timetable:</strong></td>
</tr>
</tbody>
</table>

Student dissertations will be supervised by members of the teaching staff who will advise on the choice of subject and provide guidance throughout the progress of the dissertation. The completed dissertation of not more than 15,000 words must be submitted by the end of August.

**Programme module type:** Compulsory for MSc Programmes in Mathematics and in Statistics.

**Learning and teaching methods and delivery:**

**Weekly contact:** Individual supervision

**Assessment pattern:** Dissertation = 100%

**Module Co-ordinator:** Dr J D Mitchell
Optional modules - Semester 1:

### MT5613 Advanced Topics in the History of Mathematics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level</th>
<th>Semester:</th>

#### Learning and teaching methods and delivery:

**Weekly contact**: 2 lectures and 1 tutorial.

#### Assessment pattern:

- 2 Class Tests = 34%
- Coursework: Project = 66%

**Module Co-ordinator**: Dr C Roney-Dougal

**Lecturer(s)/Tutor(s)**: Dr C Roney-Dougal, Dr C Bleak, Dr J J O’Connor, Prof E F Robertson

### MT5753 Statistical Modelling

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>2.00 pm</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This applied statistics module covers the main aspects of linear models (LMs) and generalized linear models (GLMs). In each case the course describes model specification, various options for model selection, model assessment and tools for diagnosing model faults. Common modelling issues such as collinearity and residual correlation are also addressed, and as a consequence of the latter the Generalized Least squares (GLS) method is described. The GLM component has emphasis on models for count data and presence/absence data while GLMs for multinomial (sometimes called choice-based models) are also covered for nominal and ordinal response outcomes. The largest part of the course material is taught inside an environmental impact assessment case study with reality-based research objectives. Political and medical examples are used to illustrate the multinomial models.

<table>

</tbody>
</table>

#### Learning and teaching methods and delivery:

**Weekly contact**: 6 hours lectures, 1.5 hours tutorials and 6 hours practicals (x 4 weeks).

#### Assessment pattern:

- 2-hour Written Examination = 50%
- Coursework = 50%

**Module Co-ordinator**: Dr M L MacKenzie

**Lecturer(s)/Tutor(s)**: Dr M L MacKenzie, Dr L Thomas
### MT5809 Advanced Fluid Dynamics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

#### Planned timetable:
11.00 am Mon (odd weeks), Wed and Fri

This module will examine current research in fluid dynamics, with a particular focus on meteorology and oceanography. The large-scale atmosphere and oceans behave quite unlike a 'classical' fluid owing to the presence of stable density stratification and rotation. As a result, the fluid motion is dominated by slow, 'vortical' or eddying motions (like cyclones) which generally spin slower than the Earth. Superimposed on this slow motion are relatively fast wave-like motions analogous to surface waves on a pond. These lectures describe the mathematical basis of these fundamentally different types of motion, and furthermore illustrate the increasingly important role of computer modelling in this research.

#### Programme module type:
Optional for all Postgraduate Programmes within the School of Mathematics & Statistics.

#### Learning and teaching methods and delivery:
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).

#### Assessment pattern:
2.5-hour Written Examination = 100%

**Module Co-ordinator:** Prof D G Dritschel

**Lecturer(s)/Tutor(s):** Prof D G Dritschel

### MT5810 Advanced Solar Theory

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

#### Planned timetable:
12.00 noon Mon (even weeks), Tue and Thu

The object of this module is to describe the magnetohydrodynamic processes at work in the Sun, using modern techniques of applied mathematics, and to discuss the latest theories in relation to aspects of current research within the School.

#### Programme module type:
Optional for all Postgraduate Programmes within the School of Mathematics & Statistics.

#### Learning and teaching methods and delivery:
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).

#### Assessment pattern:
2.5-hour Written Examination = 100%

**Module Co-ordinator:** Prof C E Parnell

**Lecturer(s)/Tutor(s):** Prof C E Parnell
### MT5812 Advanced Financial Mathematics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** 2.00 pm Tue and Fri

This module builds on the theory that has been taught in MT4551 by introducing further analytical and practical techniques that are used in the valuation and risk-management of all the mainstream vanilla and exotic derivatives in the Equity, Foreign Exchange, Fixed Income and Credit Markets. The focus will be on both understanding the theory as well as how it is applied in the real world environment of a derivatives trading desk. By means of lectures and practical assignments, students will also be introduced to Excel and the Visual Basic Programming language (as a working knowledge of these will be invaluable to anyone seeking a career in the areas of finance or business).

**Programme module type:** Optional for all programmes in the School of Mathematics & Statistics.

**Learning and teaching methods and delivery:** Weekly contact: 2 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).

**Assessment pattern:** 2-hour Written Examination = 50%, Coursework = 50%

**Module Co-ordinator:** Dr W R Campbell

**Lecturer(s)/Tutor(s):** Dr W R Campbell

### MT5824 Topics in Groups

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** 10.00 am Mon (odd weeks), Wed and Fri

The overall aim of this module is to build on the foundations established in MT4003/MT4603, and take the students further into this important and beautiful branch of mathematics. More specifically, through a selection of topics, some of which will be of current research interest in St Andrews, it will introduce students to advanced techniques of handling groups and classifying them.

**Programme module type:** Optional for all Postgraduate Programmes within the School of Mathematics & Statistics.

**Learning and teaching methods and delivery:** Weekly contact: 2.5 lectures (weeks 1 - 10), 1 tutorial and 1 examples class (weeks 2 - 11).

**Assessment pattern:** 2.5-hour Written Examination = 100%

**Module Co-ordinator:** Dr C P Bleak

**Lecturer(s)/Tutor(s):** Dr C P Bleak

### MT5825 Measure and Ergodic Theory

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** 10.00 am Mon (even weeks), Tue and Thu

This module introduces some of the powerful techniques and ideas of modern mathematical analysis that are important both in analysis in its own right and in its many applications in mathematics and science. The module will include topics such as: measure theory, the ergodic theorem, martingale theory. Analysis is one of the active research areas within the School, and the choice of topics will reflect current activity.

**Programme module type:** Optional for all Postgraduate Programmes within the School of Mathematics & Statistics.

**Learning and teaching methods and delivery:** Weekly contact: 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).

**Assessment pattern:** 2-hour Written Examination = 75%, Coursework = 25%

**Module Co-ordinator:** Prof L Olsen

**Lecturer(s)/Tutor(s):** Prof L Olsen
## MT5831 Advanced Bayesian Inference

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>10.00 am Mon (even weeks), Tue and Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module consists of MT4531 with an additional project which will give consideration to some more advanced aspects of the theory or to the application of Bayesian techniques. This may involve either directed reading or the use of the computer for simulation or data-based analyses. The syllabus includes Bayes' theorem, inference for Normal samples; univariate Normal linear regression; principles of Bayesian computational, Markov chain Monte Carlo - theory and applications.

**Programme module type:** Optional for all Postgraduate Programmes within the School of Mathematics & Statistics.

**Anti-requisite(s):** MT4531

**Learning and teaching methods and delivery:** Weekly contact: 2.5 lectures (weeks 1 - 10) and 8 tutorials/practical classes over semester.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module Co-ordinator:** Dr M Papathomas

**Lecturer(s)/Tutor(s):** Dr M Papathomas, Dr L Thomas

## MT5852 Mathematical Biology 2

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>9.00 am Mon (odd weeks), Wed and Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module will explore real world applications of mathematics to biological and medical problems e.g. cell movement, pattern formation in animal coat markings, spread of diseases (AIDS, measles). The mathematical techniques used in the modelling will be nonlinear partial differential equations. The module will be useful to students who wish to specialise in Applied Mathematics in their degree programme.

**Programme module type:** Optional for all MSc postgraduate programmes in the School of Mathematics & Statistics.

**Learning and teaching methods and delivery:** Weekly contact: 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).

**Assessment pattern:** 2-hour Written Examination = 90%, Coursework (Class Test) = 10%

**Module Co-ordinator:** Prof M Chaplain

**Lecturer(s)/Tutor(s):** Prof M Chaplain
### MT5701 Advanced Statistical Inference

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>10.00 am Mon (odd weeks), Wed and Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module consists of MT4606 with the addition of directed reading on more advanced aspects of the subject and a requirement to write a review essay on an aspect of the subject. The syllabus includes: comparison of point estimators; the Rao-Blackwell Theorem; distribution theory; Fisher information and the Cramer-Rao lower bound; maximum likelihood estimation; hypothesis-testing; confidence sets.

**Programme module type:** Optional for all Postgraduate Programmes within the School of Mathematics & Statistics

**Anti-requisite(s):** MT4606

**Learning and teaching methods and delivery:**

- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 0.5 tutorial (weeks 2 - 11).

**Assessment pattern:**

- 2-hour Written Examination = 75%
- Coursework: Project = 25%

**Module Co-ordinator:** Dr I B J Goudie

**Lecturer(s)/Tutor(s):** Dr I B J Goudie

### MT5757 Advanced Data Analysis

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>12.00 noon Mon (even weeks), Tue and Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module covers modern modelling methods for situations where the data fails to meet the assumptions of common statistical models and simple remedies do not suffice. This represents a lot of real world data. Methods covered include: nonlinear models; basic splines and Generalised Additive Models; Ridge Regression and Principal Components Regression; models for non-independent errors and random effects. Pragmatic data imputation is covered with associated issues. Computer intensive inference is considered throughout. Practical applications build sought-after skills in the commercial packages SAS.

**Programme module type:** Compulsory for Applied Statistics and Datamining MSc Programme. Optional for Statistics MSc Programme.

**Learning and teaching methods and delivery:**

- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 8 tutorials over the semester.

**Assessment pattern:**

- 2-hour Written Examination = 60%
- Coursework = 40%

**Module Co-ordinator:** Dr M L MacKenzie

**Lecturer(s)/Tutor(s):** Dr M L MacKenzie
## MT5758 Applied Multivariate Analysis

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>11.00 am Mon (even weeks), Tue and Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module provides introductory and advanced training in the applied analysis of multivariate data. The module emphasis is upon practical analysis of data and the extraction of answers from real-life data. Basic theory is given covering matrix algebra, metrics and general measures of similarity. The most common and fundamental methods including dimension reduction and classification are covered e.g. Multivariate Analysis of Variance, Principal Components Analysis, multidimensional scaling, Factor Analysis, clustering methods. The practical component of the module focuses on analysis of real data using the commercial software tools Excel, SAS and SPSS.

**Programme module type:** Compulsory for Applied Statistics and Datamining MSc Programme. Optional for Statistics MSc Programme.

**Anti-requisite(s):** MT4609

**Learning and teaching methods and delivery:** Weekly contact: 2.5 lectures (weeks 1 - 10), and 4 tutorials and 4 project group meetings over the semester.

**Assessment pattern:** 2-hour Written Examination = 50%, Coursework = 50%

**Module Co-ordinator:** Dr J B Illian

**Lecturer(s)/Tutor(s):** Dr J B Illian

## MT5802 Advanced Analytical Techniques

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>12.00 noon Mon (odd weeks), Wed and Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module introduces students to some further important applied analytic techniques such as Variational Calculus, Integral equations and transforms, and the theory of Steepest Descent.

**Programme module type:** Optional for all Postgraduate Programmes within the School of Mathematics & Statistics.

**Learning and teaching methods and delivery:** Weekly contact: 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).

**Assessment pattern:** 2-hour Written Examination = 75%, Coursework = 25%

**Module Co-ordinator:** Dr C V Tran

**Lecturer(s)/Tutor(s):** Dr C V Tran
### MT5806 Advanced Computational Techniques

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>12.00 noon Mon (even weeks), Tue and Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module introduces students to some of the ideas, techniques and constraints that underpin modern approaches to the numerical modeling of physical processes that may be described by partial differential equations. Students will gain expertise in implementing standard methods and will submit a short dissertation together with a portfolio of computational work.

**Programme module type:** Optional for all Postgraduate Programmes within the School of Mathematics & Statistics.

**Learning and teaching methods and delivery:** Weekly contact: 2 lectures (weeks 1 - 10) and a typical average of 0.5 hours of project supervisions (weeks 2 - 11)

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** Dr S J Brooks

**Lecturer(s)/Tutor(s):** Dr S J Brooks

### MT5821 Advanced Combinatorics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>12.00 noon Mon (odd weeks), Wed and Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Combinatorics underlies and interacts many topics in discrete mathematics including group theory, statistical design, and statistical mechanics, as well as being a lively subject in its own right. The module will give students a good grounding in the techniques and will engage students with research-level problems. It is designed to make a wide area of combinatorics available to students.

**Programme module type:** Optional for all Postgraduate Programmes within the School of Mathematics & Statistics.

**Pre-requisite(s):** MT4514 or MT4516

**Learning and teaching methods and delivery:** Weekly contact: 2.5-hour lectures (weeks 1 - 10) and 1-hour tutorial (weeks 2 - 11).

**Assessment pattern:** 2.5-hour Written Examination = 100%

**Module Co-ordinator:** Prof P J Cameron

**Lecturer(s)/Tutor(s):** Prof P J Cameron

### MT5823 Semigroups

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>9.00 am Mon (odd weeks), Wed and Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The general aim of this module is to introduce students to semigroup theory, which is the study of sets with one associative binary operation defined on them. In the process, the common aims and concerns of abstract algebra will be emphasised and illustrated by drawing comparisons between semigroups, groups and rings.

**Programme module type:** Optional for all Postgraduate Programmes within the School of Mathematics & Statistics

**Learning and teaching methods and delivery:** Weekly contact: 2.5 lectures (weeks 1 - 10), 1 tutorial and 1 examples class (weeks 2 - 11).

**Assessment pattern:** 2-hour Written Examination = 75%, Coursework = 25%

**Module Co-ordinator:** Dr J D Mitchell

**Lecturer(s)/Tutor(s):** Dr J D Mitchell
ID5059 Knowledge Discovery and Datamining

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

Planned timetable: 11.00 am Mon (odd weeks), Wed and Fri

Contemporary data collection can be automated and on a massive scale e.g. credit card transaction databases. Large databases potentially carry a wealth of important information that could inform business strategy, identify criminal activities, characterise network faults etc. These large scale problems may preclude the standard carefully constructed statistical models, necessitating highly automated approaches. This module covers many of the methods found under the banner of "Datamining", building from a theoretical perspective but ultimately teaching practical application. Topics covered include: historical/philosophical perspectives, model selection algorithms and optimality measures, tree methods, bagging and boosting, neural nets, and classification in general. Practical applications build sought-after skills in the commercial packages SAS and SPSS.

Anti-requisite(s): MT5759

Learning and teaching methods and delivery: Weekly contact: Lectures, seminars, tutorials and practical classes.

Assessment pattern: 2-hour Written Examination = 60%, Coursework = 40%

Module Co-ordinator: masters-coord-cs@st-andrews.ac.uk

Optional module - Semester 1 or 2:

MT5990 Independent Study Module

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1 or 2</th>
</tr>
</thead>
</table>

Planned timetable: To be arranged.

This module provides the opportunity for a student to study an Advanced topic as a reading course under the supervision of a member of staff. The topic will be disjoint from those available in other modules.

Programme module type: Optional for all Postgraduate Programmes within the School.

Pre-requisite(s): Permission from the Head of School

Learning and teaching methods and delivery: Weekly contact: Typically 1 hour project supervisions.

Assessment pattern: Coursework = 100%

Module Co-ordinator: TBC

Lecturer(s)/Tutor(s):
Optional modules - Whole Year:

<table>
<thead>
<tr>
<th>MT5991 Professional Skills for Mathematical Scientists</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SCOTCAT Credits:</strong> 30</td>
</tr>
<tr>
<td><strong>Availability restrictions:</strong> Available only to students on an MSc Postgraduate programme or, exceptionally, on an MMath or MPhys Honours degree programme in the School</td>
</tr>
<tr>
<td><strong>Planned timetable:</strong> To be arranged.</td>
</tr>
</tbody>
</table>

This module encompasses a range of skills, both generic and topic specific, together with taught components aimed at providing an appreciation of both breadth and depth of research areas in Pure or Applied Mathematics. The precise programme of study, together with the identification of the relevant software expertise required, will be determined in consultation with the student’s supervisor.

<table>
<thead>
<tr>
<th>Programme module type:</th>
<th>Optional for all Postgraduate programmes within the School of Mathematics &amp; Statistics. In exceptional circumstances and with the approval of the Head of School, optional for final year of MMath Programme.</th>
