Masters in Information Technology

Programme Requirements

Taught Element, and PG Diploma in Information Technology:
120 credits:
- IS5101
- remaining credits from IS5102 - IS5150, CS5001 - CS5089, ID5059

MSc:
120 credits from Taught Element, plus IS5198 or IS5199

MPhil:
120 credits from Taught Element of Information Technology plus a 40,000-word thesis

For all Masters degrees there are exit awards available that allow suitably-qualified candidates to receive a Postgraduate Certificate or Postgraduate Diploma.

Compulsory module:

<table>
<thead>
<tr>
<th>IS5101 Masters Core Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SCOTCAT Credits:</strong></td>
</tr>
<tr>
<td><strong>Planned timetable:</strong></td>
</tr>
</tbody>
</table>

This module equips students with essential skills for completing an MSc in the School of Computer Science. Topics include: technical writing for Computer Science and Information Technology; use of bibliographic and referencing software; presentation skills; critical analysis of written work; generic research skills including framing research hypotheses, designing and conducting experiments, use of survey tools and gathering, analysing and presenting data; understanding basic statistics; use of project planning techniques; awareness of professional and ethical issues in research activities; carrying out a literature review; and awareness of what constitutes academic misconduct. Skills in these areas are reinforced through practical assignments.

**Programme module type:** Compulsory for all Postgraduate Programmes except Erasmus Mundus Dependable Software Systems.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk
## Compulsory module for MSc - one of:

### IS5198 Group Project and Dissertation in Information Technology

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>60</th>
<th>SCQF Level</th>
<th>Semester:</th>
<th>Summer</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module is a group-based MSc project on an approved topic in Information Technology which shows appropriate competences in the field. It results in an individual dissertation of no more than 15,000 words submitted by each student. Typically the dissertation comprises a review of related work, the extension of old or development of new ideas, the development of a software system or skilled use of one or more applications, a critical analysis and evaluation of the project outputs. The dissertation may also include an agreed collaboratively-written group report. Each student is individually assessed, taking into account both individual and group submissions. Students are required to give a presentation of their work.

**Programme module type:** Optional for Information Technology, Computing and Information Technology MSc Postgraduate Programmes.

**Pre-requisite(s):** Admission to dissertation phase of MSc and the consent of the Head of School

**Anti-requisite(s):** IS5199

**Learning and teaching methods and delivery:** Weekly contact: Meeting with supervisor.

**Assessment pattern:** Coursework (Dissertation) = 100%

**Module Co-ordinator:** masters-is-coord-cs@st-andrews.ac.uk

### IS5199 Dissertation in Information Technology

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>60</th>
<th>SCQF Level</th>
<th>Semester:</th>
<th>Summer</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module is an individually supervised MSc project on an approved topic in Information Technology which shows appropriate competences in the field. The project results in a dissertation of no more than 15,000 words. Typically the dissertation comprises a review of related work, the extension of old or development of new ideas, the development of a software system or skilled use of one or more applications, a critical analysis and evaluation of the project outputs. Students are required to give a presentation of their work.

**Programme module type:** Optional for Information Technology, Computing and Information Technology MSc Postgraduate Programmes.

**Pre-requisite(s):** Admission to dissertation phase of the MSc

**Anti-requisite(s):** IS5198

**Learning and teaching methods and delivery:** Weekly contact: Meeting with supervisor.

**Assessment pattern:** Coursework (Dissertation) = 100%

**Module Co-ordinator:** masters-is-coord-cs@st-andrews.ac.uk
## Optional modules:

### IS5102 Database Management Systems

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module introduces the core principles and techniques required in the design and implementation of database systems. With a focus on relational database management systems, topics include database design theory; E-R modelling; data definition and manipulation languages; database security and administration. There is a significant practical element to the module, which will require students to build and manipulate a database.

**Programme module type:** Optional for all Postgraduate Programmes.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 40%, Coursework = 60%

**Module Co-ordinator:** masters-coord-CS@st-andrews.ac.uk

### IS5103 Web Technologies

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module introduces the principles and techniques involved in the design and implementation of web applications. A web application is a collection of web pages that interact with the user, with each other, and with various resources on a web server, including databases. There is a significant practical element to the module, which will require students to build and manipulate dynamic web pages.

**Programme module type:** Optional for all Postgraduate Programmes.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 40%, Coursework = 60%

**Module Co-ordinator:** masters-coord-CS@st-andrews.ac.uk

### IS5104 Information Security Management

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module reviews key theoretical and practical aspects of Information Security Management. The module content covers higher-level technical and theoretical issues as well as management issues such as organisational, planning, certification, auditing and governance. From the student’s perspective the module introduces students to a topical field of business and IT concern via varied learning styles and in depth consideration of current issues, standards and scenarios. The module uses both block learning and individual self-learning.

**Programme module type:** Optional for all Taught Postgraduate Programmes.

**Anti-requisite(s):** CS4203

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 40%, Coursework = 60%

**Module Co-ordinator:** masters-coord-CS@st-andrews.ac.uk
### IS5105 Network Systems Management

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module looks at the history of computer networks, examines how computer networks function, and surveys emerging and future networking technologies. Networked computer systems are pervasive in every walk of life. Today’s mobile phones are more powerful computing devices than the mainframes of thirty years ago. Few organizations could function without computer networks. It gives insights into computer networking from the perspectives of developers, managers and users. Students taking this module will gain a core understanding of networking principles and protocols for wired and wireless networking. They will learn about the main aspects of network systems management, including network monitoring and configuration management, network service management, and firewall management.

**Programme module type:** Optional for all Postgraduate Programmes.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk

### IS5106 Green Information Technology

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module introduces students to a variety of topics and technologies in the area of Green IT and Sustainable IT. Students investigate the way in which technology contributes towards global emissions as well as its potential to enable a positive sustainable future. This includes the responsibilities and actions of IT users, as well as service providers. The module covers key factors driving Green IT from a technical, political, financial, social and legal perspective, and includes the IT life cycle, approaches to product design and the provision of IT services. Students gain understanding and insight into current issues related to sustainable IT usage and future development.

**Programme module type:** Optional for all Postgraduate Programmes.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars and tutorials

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk

### IS5108 Information Technology Projects

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module reinforces information technology and project management skills gained during semester 1, by means of a selection of coursework assignments posed as information technology projects. These are designed to offer increasing depth and scope for creativity as the module progresses.

**Programme module type:** Optional for all Postgraduate Programmes.

**Anti-requisite(s):** CS5003

**Learning and teaching methods and delivery:** Weekly contact: Lectures, tutorials and practical classes

**Assessment pattern:** Coursework = 100%
### CS5001 Object-Oriented Modelling, Design and Programming

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level</th>
<th>11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** Variable

This module introduces and revises object-oriented modelling, design and implementation up to the level required to complete programming assignments within other MSc modules. Students complete a number of practical exercises in laboratory sessions.

**Programme module type:** Compulsory for Advanced Computer Science, Artificial Intelligence, Human Computer Interaction, Networks and Distributed Systems, Software Engineering and Erasmus Mundus Dependable Software Systems Postgraduate Programmes. Either CS5001 or CS5002 is compulsory for Computing and Information Technology Postgraduate Programmes. Optional for Data-Intensive Analysis or Management and Information Technology Postgraduate Programmes.

**Anti-requisite(s):** CS5002

**Required for:** CS5011, CS5021, CS5031

**Learning and teaching methods and delivery:** Weekly contact: Lectures, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk

### CS5002 Programming Principles and Practice

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level</th>
<th>11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** Variable

This module introduces computational thinking and problem solving skills to students who have no or little previous programming experience. It covers general programming concepts used in the development of software applications, such as data structures, functions, choice, iteration, recursion and input/output. An easy-to-learn programming language is used to illustrate these concepts, and programming skills are reinforced through practical assignments.

**Programme module type:** Either CS5001 or CS5002 is compulsory for Computing and Information Technology Postgraduate Programmes. Optional for Data-Intensive Analysis or Management and Information Technology Postgraduate Programmes.

**Anti-requisite(s):** CS5001

**Required for:** CS5003

**Learning and teaching methods and delivery:** Weekly contact: Lectures, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk
CS5003 Masters Programming Projects

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>Variable</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module reinforces key programming skills gained in CS5002, by means of a series of coursework assignments posed as small programming projects. These are designed to offer increasing depth and scope for creativity as the module progresses.

Programme module type: Compulsory for Computing and Information Technology Postgraduate Programme. Optional for Data-Intensive Analysis MSc Programme and Information Technology MSc Programme

Pre-requisite(s): CS5002  
Anti-requisite(s): IS5108

Learning and teaching methods and delivery: Weekly contact: Lectures, tutorials and practical classes.

Assessment pattern: Coursework = 100%

Module Co-ordinator: masters-coord-cs@st-andrews.ac.uk

CS5010 Artificial Intelligence Principles

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module covers foundational knowledge of Artificial Intelligence (AI). The module gives an overview of AI and its philosophy. It covers fundamental principles in AI: logical reasoning, reasoning in the presence of uncertainty, and machine learning. It shows how search is used to solve a variety of problems in AI. Notions such as agency and uncertainty in AI are covered. Finally, the philosophy of AI in practice and the philosophical problems in AI are shown.

Programme module type: Compulsory for Artificial Intelligence Postgraduate Programme. Optional for all Postgraduate Programmes in the School of Computer Science.

Anti-requisite(s): CS3105  
Required for: CS5011

Learning and teaching methods and delivery: Weekly contact: Lectures, seminars, tutorials and practical classes.

Assessment pattern: 2-hour Written Examination = 60%, Coursework = 40%

Module Co-ordinator: masters-coord-cs@st-andrews.ac.uk
### CS5011 Artificial Intelligence Practice

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module covers practical design and implementation of Artificial Intelligence (AI). It provides grounding in AI technique, covering techniques in the areas of AI reasoning, planning, doing, and learning. Finally, it is shown how to implement AI ideas in software and how to evaluate such implementation.

**Programme module type:** Compulsory for Artificial Intelligence Postgraduate Programme. Optional for other Postgraduate Programmes.

**Co-requisite(s):** CS5001, CS5010  
**Required for:** CS5012, CS5019

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk

### CS5012 Language and Computation

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module covers the major aspects of natural language processing and speech understanding, including computational syntax, computational semantics, discourse processing, machine translation and speech recognition.

**Programme module type:** Either CS5012 or CS4402 is compulsory for the Artificial Intelligence Postgraduate Programme. Optional for Postgraduate Programmes in the School of Computer Science.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk

### CS5021 Advanced Networks

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module looks forward to new concepts and topics in networking, and also reviews key abstractions including layered models, protocols and Internet architecture, and key concerns such as reliability, resource utilization and quality of service. Specific networking technologies are used to demonstrate monitoring, measurement and analysis of real traffic.

**Programme module type:** Compulsory for Networks and Distributed Systems Postgraduate Programme. Optional for other Postgraduate Programmes.

**Pre-requisite(s):** -  
**Anti-requisite(s):** CS3102

**Co-requisite(s):** CS5001  
**Required for:** CS5023, CS5029

**Learning and teaching methods and delivery:** Weekly contact: Weekly lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 40%, Coursework = 60%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk
## CS5023 Mobile and Wireless Networks

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module examines how computing and communication are used to allow mobile systems to function in heterogeneous environments, with variations in available network resources and diverse/intermittent network connectivity. A key outcome of the module is for students to be able to critically assess the capabilities and constraints of mobile systems.

**Programme module type:** Either CS4103 or CS5023 is compulsory for Networks and Distributed Systems Postgraduate Programmes. Optional for all other Postgraduate Programmes in the School of Computer Science.

**Learning and teaching methods and delivery:** Weekly contact: Weekly lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk

## CS5030 Software Engineering Principles

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module examines the key concepts in small and large-scale software development. Project management is explored, along with the processes involved in developing system requirements, functionality and high-level descriptions necessary to guide the development of, and assess, a working system.

**Programme module type:** Compulsory for Software Engineering Postgraduate Programme. Optional for other Postgraduate Programmes.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk
CS5031 Software Engineering Practice

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module introduces advanced software engineering methods supporting the development of complex, composite software systems with an emphasis on software configuration management, reuse and test-driven development practices. It examines software reuse at different levels of scale, from software libraries and components to service-oriented architectures and discusses how reuse presents both challenges and opportunities for the development of quality software. A key process in today's software engineering practice is testing; the module introduces testing methods that complement the different scales of reuse-oriented development, from unit-level testing to integration testing and system-level testing. Students work on a project to design, implement and test a complex, distributed application to put the content of the lectures into practice. Reference is made to the content of the co-requisite Software Engineering Principles module where appropriate, so that students learn how the practices studied fit into a larger software engineering lifecycle.

Programme module type: Compulsory for Software Engineering Postgraduate Programme. Optional for other Postgraduate Programmes.

Co-requisite(s): CS5001, CS5030

Required for: CS5032, CS5033, CS5039

Learning and teaching methods and delivery: Weekly contact: Weekly lectures, seminars, tutorials and practical classes.

Assessment pattern: Coursework = 100%

Module Co-ordinator: masters-coord-cs@st-andrews.ac.uk

CS5032 Critical Systems Engineering

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module provides students with an understanding of the concepts and development techniques used for critical, socio-technical systems. On completion they will understand the notion of system dependability, the key characteristics of dependable systems, and the specialised software engineering techniques that may be used to ensure dependable system operation. Students also gain practical experience of applying some of these techniques in systems specification, design or implementation.

Programme module type: CS5032 or CS5033 is compulsory for Software Engineering Postgraduate Programme. Optional for all other Postgraduate Programmes in the School of Computer Science.

Learning and teaching methods and delivery: Weekly contact: Weekly lectures, seminars, tutorials and practical classes.

Assessment pattern: 2-hour Written Examination = 60%, Coursework = 40%

Module Co-ordinator: masters-coord-cs@st-andrews.ac.uk
### CS5040 Human Computer Interaction Principles and Methods

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module provides a grounded introduction to the principles of human computer interaction in the context of evaluation paradigms. Material includes: history of interfaces and interaction; the human (vision, perception, memory, hearing); the computer (from existing to next generation ubiquitous computing systems); paradigms of interaction; evaluation paradigms in HCI; guidelines and heuristics; experimental design and hypothesis testing in HCI; quantitative evaluation methods in HCI; qualitative evaluation methods in HCI.

**Programme module type:** Compulsory for MSc Human Computer Interaction Postgraduate Programme. Optional for other Postgraduate Programmes

**Anti-requisite(s):** CS3106

**Learning and teaching methods and delivery:** Weekly contact: Lectures, practical classes and tutorials.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk

### CS5041 Interactive Software and Hardware

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Availability restrictions:** The module is available to all students enrolled on the MSc Human Computer Interaction Programme. A quota for other students may be necessary due to lab equipment constraints, in which case preference will be given to other MSc students.

**Planned timetable:** To be arranged.

This module develops prototype-building skills for a wide range of interactive technologies. Students learn how to create interactive hardware and software using technologies such as tangible programming kits, mobile devices, microprocessor kits and depth cameras. There is a strong emphasis on practical assignments.

**Programme module type:** Compulsory for MSc Human Computer Interaction Postgraduate Programme. Optional for other Postgraduate Programmes

**Co-requisite(s):** CS5001

**Learning and teaching methods and delivery:** Weekly contact: Lectures, practical classes and tutorials.

**Assessment pattern:** Coursework = 100%

**Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk
### CS5042 User-Centred Interaction Design

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Availability restrictions:</strong></td>
<td>The module is available to all students enrolled on the MSc Human Computer Interaction Programme. A quota for other students may be necessary due to lab equipment constraints, in which case preference will be given to other MSc students.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Planned timetable:</strong></td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module studies methodologies in interaction design that are at the core of current practice for user interface engineering and application development. Students work towards creating designs of interactive systems that are based on human, group and organisation needs rather than on technical constraints. The module does not involve a great deal of programming.

- **Programme module type:** Optional for all Postgraduate Programmes
- **Weekly contact:** 2 lectures, 3 practicals and 1 tutorial.
- **Assessment pattern:** Coursework = 85%, Presentation = 15%
- **Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk

### CS5044 Information Visualisation and Visual Analytics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Planned timetable:</strong></td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module provides an introduction to information visualisation and visual analytics. It focuses on the question of how to utilise visual representations to make information accessible for exploration and analysis. The module covers basic principles of visualisation design and interaction principles. It introduces a range of visualisation techniques and tools, and discusses how these can be effectively applied in various scenarios for communication, exploration and analysis, and how to evaluate information visualisations in different contexts.

Skills in designing, developing, and evaluating information visualisations are reinforced through practical assignments. There are no pre-requisites for this module but students should have basic programming skills (e.g. in Java or JavaScript).

- **Programme module type:** Optional for all Postgraduate Programmes
- **Weekly contact:** 3-hour lecture (x 11 weeks), 1-hour seminar (x 8 weeks)
- **Assessment pattern:** 2-hour Written Examination = 40%, Coursework = 60%
- **Module Co-ordinator:** masters-coord-cs@st-andrews.ac.uk
### CS5052 Data-Intensive Systems

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>
<td>To be arranged</td>

<td></td>
<td></td>
</tr>
</tbody>
</table>

The era of big data is upon us - the volume, velocity and variety of enterprise and scientific data are growing at an exponential rate and will continue to do so for the foreseeable future. This module presents the programming paradigms, algorithmic techniques and design principles for large-scale distributed systems, such as those utilised by companies such as Google, Amazon and Facebook. This module is different in scope from CS4103 (distributed systems) as it focuses primarily on building and utilising large-scale clusters.

The module will cover: distributed systems architecture, replication and fault tolerance, storage, coordination, scheduling algorithms, cluster computing, cloud computing, virtualisation, programming models (e.g., MapReduce), stream processing, decentralised systems (e.g., Chord), incentive-based systems (e.g., BitTorrent), and social computing (e.g., crowd sourcing techniques). This module will draw from the latest research in both academia and industry.

<table>

Contemporary data collection can be automated and on a massive scale e.g. credit card transaction databases. Large databases potentially carry a wealth of important information that could inform business strategy, identify criminal activities, characterise network faults etc. These large scale problems may preclude the standard carefully constructed statistical models, necessitating highly automated approaches. This module covers many of the methods found under the banner of "Datamining", building from a theoretical perspective but ultimately teaching practical application. Topics covered include: historical/philosophical perspectives, model selection algorithms and optimality measures, tree methods, bagging and boosting, neural nets, and classification in general. Practical applications build sought-after skills in programming (typically R, SAS or python).
