This module equips students with essential skills for completing an MSc in the School of Computer Science. Topics include: technical writing for Computer Science and Information Technology; use of bibliographic and referencing software; presentation skills; critical analysis of written work; generic research skills including framing research hypotheses, designing and conducting experiments, use of survey tools and gathering, analysing and presenting data; understanding basic statistics; use of project planning techniques; awareness of professional and ethical issues in research activities; carrying out a literature review; and awareness of what constitutes academic misconduct. Skills in these areas are reinforced through practical assignments.

**Programme module type:** Compulsory for all Postgraduate Programmes except European Masters in Dependable Software Systems.

**Learning and teaching methods and delivery:**

**Weekly contact:** Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module coordinator:** dopgt-cs@st-andrews.ac.uk
### CS5001 Object-Oriented Modelling, Design and Programming

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** Variable

This module introduces and revises object-oriented modelling, design and implementation up to the level required to complete programming assignments within other MSc modules. Students complete a number of practical exercises in laboratory sessions.

**Programme module type:** Compulsory for Advanced Computer Science, Artificial Intelligence, Computer Communication Systems and Software Engineering Postgraduate Programmes, except when exempted following satisfactory performance in an assessment conducted by the school. Compulsory for European Masters in Dependable Software Systems Postgraduate Programme. Either CS5001 or CS5002 is compulsory for Human Computer Interaction and Computing and Information Technology Postgraduate Programmes. Optional for Data-Intensive Analysis, Information Technology and Management and Information Technology Postgraduate Programmes.

**Anti-requisite(s):** CS5002

**Required for:** CS5011, CS5022, CS5031, CS5052

**Learning and teaching methods and delivery:** Weekly contact: Lectures, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module coordinator:** dopgt/cs@st-andrews.ac.uk

### CS5010 Artificial Intelligence Principles

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module covers foundational knowledge of Artificial Intelligence (AI). The module gives an overview of AI and its philosophy. It covers fundamental principles in AI: logical reasoning, reasoning in the presence of uncertainty, and machine learning. It shows how search is used to solve a variety of problems in AI. Notions such as agency and uncertainty in AI are covered. Finally, the philosophy of AI in practice and the philosophical problems in AI are shown.

**Programme module type:** Compulsory for Artificial Intelligence Postgraduate Programme. Optional for all Postgraduate Programmes in the School of Computer Science.

**Anti-requisite(s):** CS3105

**Required for:** CS5011

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module coordinator:** dopgt/cs@st-andrews.ac.uk
**CS5011 Artificial Intelligence Practice**

<table>

</tr>
</tbody>
</table>

This module covers practical design and implementation of Artificial Intelligence (AI). It provides grounding in AI technique, covering techniques in the areas of AI reasoning, planning, doing, and learning. Finally, it is shown how to implement AI ideas in software and how to evaluate such implementation.

**Programme module type:** Compulsory for Artificial Intelligence Postgraduate Programme. Optional for other Postgraduate Programmes.

**Co-requisite(s):** CS5001, CS5010  
**Required for:** CS5012, CS5019

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module coordinator:** dopgt@cs.st-andrews.ac.uk

</table>

This module covers the major aspects of natural language processing and speech understanding, including computational syntax, computational semantics, discourse processing, machine translation and speech recognition.

**Programme module type:** Either CS5012 or CS4402 is compulsory for the Artificial Intelligence Postgraduate Programme. Optional for Postgraduate Programmes in the School of Computer Science.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module coordinator:** dopgt@cs@st-andrews.ac.uk

<td></td>
<td></td>
</tr>
</tbody>
</table>

This module introduces constraint-based reasoning as a powerful mechanism for knowledge representation and inference. It provides a thorough grounding in the constraint satisfaction/constrained optimisation problem formalism, and covers both basic techniques for implementing constraint solvers and the use of advanced techniques with a modern solver.

**Programme module type:** Either CS5012 or CS4402 is compulsory for the Artificial Intelligence Postgraduate Programme. Optional for Erasmus Mundus Dependable Software Systems Postgraduate Programme and other Postgraduate Programmes in the School

**Learning and teaching methods and delivery:** Weekly contact: 2 lectures (x 11 weeks) and fortnightly tutorial.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

This module is a group-based MSc project on a topic in Computer Science. It results in an individual dissertation of no more than 15,000 words submitted by each student. Typically the dissertation comprises a review of related work, the extension of old or development of new ideas, software implementation and testing, analyses and evaluation. The dissertation may also include an agreed collaboratively-written group report. Each student is individually assessed, taking into account both individual and group submissions. Students are required to give a presentation of their work.

**Programme module type:** Either CS5099 or CS5098 is compulsory for the Advanced Computer Science, Artificial Intelligence, Data-Intensive Analysis, Human Computer Interaction, Computer Communication Systems and Software Engineering MSc

**Pre-requisite(s):** Admission to dissertation phase of MSc and permission of the Head of School

**Anti-requisite(s):** CS5099

**Learning and teaching methods and delivery:** Weekly contact: Meetings with supervisor.

**Assessment pattern:** Coursework = 100%

**Module coordinator:** dopgt-cs@st-andrews.ac.uk
