Compulsory modules:

### ET5400 English for Academic Purposes (Combined Masters)

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module is designed to develop the academic literacy of students entering onto a taught masters programme at the University of St Andrews. Students develop the academic competence required for writing, delivering presentations, participating in seminars, researching for and evaluating source material, and developing criticality in respect of all aspects of their studies.

**Programme module type:** Compulsory for Postgraduate Programmes in Computer Science including English Language.

**Pre-requisite(s):** Student must be a user of English as an Additional Language. Student must be enrolled on a 20 month Masters degree in the School of Computer Science.

**Co-requisite(s):** Student must be enrolled on CS5001 (or equivalent) and English for Computer Science 1 (ET5401).

**Learning and teaching methods and delivery:**

- **Weekly contact:** 6 class tutorials (x 11 weeks), 0.5 individual supervision meeting (x 5 weeks)

**Assessment pattern:**

- 2-hour Written Examination = 25%, Coursework = 75%
- Coursework contains 2 elements: a extended essay ((50% of grade) and a presentation (25% of grade).

**Module coordinator:** Mr J Harvey

**Module teaching staff:** Mr J Harvey, Mrs K Tavakoli, Ms L Thirkell

### ET5401 English for Computer Science

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module is designed to develop the academic literacy of students entering onto MSc programmes in the School of Computer Science, and this module runs in parallel with English for Academic Purposes (ET5400). Strategies learnt in ET5400 will be applied to specific Computer Science-based texts, and written and spoken tasks. Students will also participate in assessed group projects modelled on similar assessments in 5000-level Computer Science (CS) modules.

**Programme module type:** Compulsory for Postgraduate Programmes in Computer Science including English Language.

**Pre-requisite(s):** The student must be a user of English as an Additional Language

**Co-requisite(s):** ET5400, CS5001 or CS5002

**Learning and teaching methods and delivery:**

- **Weekly contact:** 6 class tutorials (x 11 weeks), one individual supervision meeting (.05 hours, x 5 weeks)

**Assessment pattern:**

- Coursework = 100%

**Module coordinator:** Ms J Brooks

**Module teaching staff:** Ms J Brooks, Ms M Carr
### ET5402 English for Computer Science 2

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Availability restrictions:** Available only to students on MSc programme in the School of Computer Science and must be taking other relevant modules on that programme.

**Planned timetable:** To be arranged.

This module is designed to follow on from ET5401 and ET5400 to further enhance the academic literacy of students on MSc Programmes in the School of Computer Science. Strategies learnt on the two modules mentioned above will be applied to specific Computer Science-based texts, and written and spoken tasks. Students will also participate in assessed group projects modelled on similar assessments in 5000-level CS modules.

**Programme module type:** Compulsory for Postgraduate Programmes in Computer Science including English Language.

**Pre-requisite(s):** ET5401

**Co-requisite(s):** The student must be studying on an MSc programme in the School of Computer Science and must be taking other relevant modules on that programme.

**Learning and teaching methods and delivery:**  
- **Weekly contact:** 6 class tutorials (x 11 weeks), one individual supervision meeting (0.5 hours, 5 weeks)

**Assessment pattern:** Coursework = 100%

**Module coordinator:** Ms J Brooks

**Module teaching staff:** Ms J Brooks, Ms M Carr

### IS5101 Masters Core Skills

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>Whole Year</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module equips students with essential skills for completing an MSc in the School of Computer Science. Topics include: technical writing for Computer Science and Information Technology; use of bibliographic and referencing software; presentation skills; critical analysis of written work; generic research skills including framing research hypotheses, designing and conducting experiments, use of survey tools and gathering, analysing and presenting data; understanding basic statistics; use of project planning techniques; awareness of professional and ethical issues in research activities; carrying out a literature review; and awareness of what constitutes academic misconduct. Skills in these areas are reinforced through practical assignments.

**Programme module type:** Compulsory for all Postgraduate Programmes except European Masters in Dependable Software Systems.

**Learning and teaching methods and delivery:**  
- **Weekly contact:** Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module coordinator:** dopgt-cs@st-andrews.ac.uk
CS5001 Object-Oriented Modelling, Design and Programming

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** Variable

This module introduces and revises object-oriented modelling, design and implementation up to the level required to complete programming assignments within other MSc modules. Students complete a number of practical exercises in laboratory sessions.

**Programme module type:** Compulsory for Advanced Computer Science, Artificial Intelligence, Computer Communication Systems and Software Engineering Postgraduate Programmes, except when exempted following satisfactory performance in an assessment conducted by the school.

Compulsory for European Masters in Dependable Software Systems Postgraduate Programme

Either CS5001 or CS5002 is compulsory for Human Computer Interaction and Computing and Information Technology Postgraduate Programmes.

Optional for Data-Intensive Analysis, Information Technology and Management and Information Technology Postgraduate Programmes.

**Anti-requisite(s):** CS5002

**Required for:** CS5011, CS5022, CS5031, CS5052

**Learning and teaching methods and delivery:** Weekly contact: Lectures, tutorials and practical classes.

**Assessment pattern:** Coursework = 100%

**Module coordinator:** dopgt-cs@st-andrews.ac.uk

CS5030 Software Engineering Principles

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Planned timetable:** To be arranged.

This module examines the key concepts in small and large-scale software development. Project management is explored, along with the processes involved in developing system requirements, functionality and high-level descriptions necessary to guide the development of, and assess, a working system.

**Programme module type:** Compulsory for Software Engineering Postgraduate Programme.

Optional for other Postgraduate Programmes.

**Learning and teaching methods and delivery:** Weekly contact: Lectures, seminars, tutorials and practical classes.

**Assessment pattern:** 2-hour Written Examination = 60%, Coursework = 40%

**Module coordinator:** dopgt-cs@st-andrews.ac.uk
### CS5031 Software Engineering Practice

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>
**Planned timetable:** To be arranged.

This module introduces advanced software engineering methods supporting the development of complex, composite software systems with an emphasis on software configuration management, reuse and test-driven development practices. It examines software reuse at different levels of scale, from software libraries and components to service-oriented architectures and discusses how reuse presents both challenges and opportunities for the development of quality software. A key process in today's software engineering practice is testing; the module introduces testing methods that complement the different scales of reuse-oriented development, from unit-level testing to integration testing and system-level testing. Students work on a project to design, implement and test a complex, distributed application to put the content of the lectures into practice. Reference is made to the content of the co-requisite Software Engineering Principles module where appropriate, so that students learn how the practices studied fit into a larger software engineering lifecycle.

### CS5032 Critical Systems Engineering

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>
**Planned timetable:** To be arranged.

The aim of this module is to provide students with an understanding of the concepts and development techniques used for critical, socio-technical systems. When students have completed this module they will:
understand the notion of system dependability and the key characteristics of dependable systems;
understand the specialised software engineering techniques that may be used to ensure dependable system operation; have practical experience of applying some of these techniques in systems specification, design or implementation.

<table>

</tbody>
</table>

This module introduces students to the concept of software architecture, as an aid to software design, reuse and evolution. When students have completed this module, they will: have knowledge of the key elements of software architectures; recognise architectural styles of existing software systems; be able to describe the software architecture of a non-trivial system accurately; be able to construct systems that satisfy an architectural description; understand how software architecture aids design, reuse and evolution of software.

Programme module type:
- CS5032 or CS5033 is compulsory for Software Engineering Postgraduate Programme
- Optional for all other Postgraduate Programmes in the School of Computer Science

Learning and teaching methods and delivery:
- Weekly contact: Lectures, seminars, tutorials and practical classes.

Assessment pattern:
- 2-hour Written Examination = 60%, Coursework = 40%

Module coordinator:
- dopgt-cs@st-andrews.ac.uk

EITHER

CS5098 Group Project and Dissertation in Computer Science

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>60</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planned timetable:</td>

<td></td>
<td></td>
</tr>
</tbody>
</table>

This module is a group-based MSc project on a topic in Computer Science. It results in an individual dissertation of no more than 15,000 words submitted by each student. Typically the dissertation comprises a review of related work, the extension of old or development of new ideas, software implementation and testing, analyses and evaluation. The dissertation may also include an agreed collaboratively-written group report. Each student is individually assessed, taking into account both individual and group submissions. Students are required to give a presentation of their work.

Programme module type:
- Either CS5099 or CS5098 is compulsory for the Advanced Computer Science, Artificial Intelligence, Data-Intensive Analysis, Human Computer Interaction, Computer Communication Systems and Software Engineering MSc

Pre-requisite(s):
- Admission to dissertation phase of MSc and permission of the Head of School

Anti-requisite(s):
- CS5099

Learning and teaching methods and delivery:
- Weekly contact: Meetings with supervisor.

Assessment pattern:
- Coursework = 100%

Module coordinator:
- dopgt-cs@st-andrews.ac.uk
### CS5099 Dissertation in Computer Science

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>60</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>Summer</th>

</tbody>
</table>

This module is an individually supervised MSc project on a topic in Computer Science. It results in a dissertation of no more than 15,000 words. Typically the dissertation comprises a review of related work, the extension of old or development of new ideas, software implementation and testing, analyses and evaluation. Students are required to give a presentation of their work.

**Programme module type:** Either CS5099 or CS5098 is compulsory for the Advanced Computer Science, Artificial Intelligence, Data-Intensive Analysis, Human Computer Interaction, Computer Communication Systems and Software Engineering MSc

**Pre-requisite(s):** Admission to dissertation phase of MSc and permission of the Head of School

**Anti-requisite(s):** CS5098

**Learning and teaching methods and delivery:** **Weekly contact:** Meeting with supervisor.

**Assessment pattern:** Coursework = 100%

**Module coordinator:** dopgt-CS@st-andrews.ac.uk

---

Optional modules are available - see the pdf online called Computer Science - optional modules 2017 - 2018.
