Academic year: 2018/9

Planned timetable: To be arranged.

This module aims to equip students with a deep knowledge of fundamental concepts and terminologies of computer communication systems (CCS). It will illustrate fundamental principles with reference to widely-used systems and technologies for CCS and enable students to use high level tools for networked systems configuration, exploration and management of CCS. Students will also be made aware of security and privacy principles and how they are used in CCS.

Pre-requisite(s): Undergraduate - before taking this module you must pass CS2002 and (pass CS2001 or pass cs2101)

Anti-requisite(s): You cannot take this module if you take CS3102

Learning and teaching methods of delivery: Weekly contact: 2 lectures (x 11 weeks), 1 tutorial (x 6 weeks)

Assessment pattern: As used by St Andrews:
2-hour Written Examination = 60%, Coursework = 40%

Re-assessment pattern: 2-hour Written Examination = 60%, Existing Coursework = 40%
