## School of Geography & Geosciences

### Important Degree Information:

**B.Sc./M.A. Honours**

The general requirements are 480 credits over a period of normally 4 years (and not more than 5 years) or part-time equivalent; the final two years being an approved honours programme of 240 credits, of which 90 credits are at 4000 level and at least a further 120 credits at 3000 and/or 4000 (H) levels. Refer to the appropriate Faculty regulations for lists of subjects recognised as qualifying towards either a B.Sc. or M.A. degree.

**B.Sc./M.A. Honours with Integrated Year Abroad**

The general requirements are 540 credits over a period of normally 5 years (and not more than 6 years) or part-time equivalent; the final three years being an approved honours programme of 300 credits, of which 60 credits are gained during the integrated year abroad, 90 credits are at 4000 level and at least a further 120 credits at 3000 and/or 4000 (H) levels. Refer to the appropriate Faculty regulations for lists of subjects recognised as qualifying towards either a B.Sc. or M.A. degree.

**Other Information:** In the case of students who spend part of the Honours Programme abroad on a recognised Exchange Scheme, the Programme Requirements will be amended to take into account courses taken while abroad.

**Degree Programmes**

(M.A. Honours):
- Geography and Art History,
- Economics, English*,
- Hebrew, International
- Relations, Italian^,
- Management~,
- Mediaeval
- History, Middle East Studies,
- Modern History, Psychology,
- Scottish History, Social
- Anthropology, Spanish^,
- Theological Studies.

(B.Sc. Honours):
- Geography and Management~,
- Management Science,
- Mathematics, Statistics.

^ available also as ‘with Integrated Year
Abroad Degrees’

~Timetable clash exists, therefore this
combination is subject to arrangement
with both Departments.

* Timetable clash means that 2000
level English must be taken in the
First year to do this combination

**Programme Requirements at:**

**Geography element of Joint Honours Degrees:**

**Level 1:** 40 credits comprising passes in GE1001 and GE1002

**Level 2:** 60 credits comprising passes at 11 or better in (GE2011 and

**Level 3:** Level 3 & Level 4 (Joint Honours Degree) Requirements:
30 credits from GE3001, GE3002, GE3004, GE3005, either GE3006 or
GE3007, GE3008, GG3011, GE4014; plus GE4018; plus 60 additional
3000 and 4000 level credits from GE3025-GE3073, GE4026-GE4072
and/or GG3021-GG3089, GG4042-GG4073. Of the 240 credits required
for an Honours degree, 90 credits from Joint Honours subjects must be at
4000 level.

**Level 4(H):** see above

**Geography element of Joint Degree:**

**Level 1:** 40 credits comprising passes in GE1001 and GE1002

**Level 2:** 60 credits comprising passes at 11 or better in (GE2011 and

**Level 3:** Level 3 & Level 4 (Joint Honours Degree) Requirements:
30 credits from GE3001, GE3002, GE3004, GE3005, either GE3006 or
GE3007, GE3008, GG3011, GE4014; plus GE4018; plus 60 additional
3000 and 4000 level credits from GE3025 – GE3073, GE4026 –
GE4072 and/or GG3021 – GG3089, GG4042 – GG4073, GG4082. Of the
240 credits required for an Honours degree, 90 credits from Joint
Honours subjects must be at 4000 level.

**Level 4(H):** see above

**Geography element of Major Degrees:**

**Level 1:** 40 credits comprising passes in GE1001 and GE1002

**Level 2:** 60 credits comprising passes at 11 or better in (GE2011 and

**Level 3:** Level 3 & Level 4 (Major Honours Degree) Requirements:
GE3004, GE4014; plus any four of : GE3001, GE3002, GE3005, either
GE3006 or GE3007, GE3008, GG3011; plus GE4018; plus 90
additional 3000 and 4000 level credits from GE3025-GE3073, GE4026-
GE4072 and/or GG3021-GG3089, GG4042-GG4073. Of the 240 credits
required for an Honours degree, 90 credits from major and/or minor
subjects must be at 4000 level.

### Degree Programmes

#### Geoscience - Chemistry Joint Degree:

<table>
<thead>
<tr>
<th>Level</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Level 1:</strong></td>
<td>40 credits comprising passes in GS1001 and GS1002 and 40 credits comprising Pass or bypass for CH1001, pass in CH1004</td>
</tr>
<tr>
<td><strong>Level 2:</strong></td>
<td>60 credits comprising passes at 11 or better in (GG2003, GG2004, GS2001, and GS2002) or (GS2011 and GS2012) and 60 credits comprising passes at 11 or better in CH2101, either CH2102 or CH2103</td>
</tr>
<tr>
<td><strong>Level 3:</strong></td>
<td>120 credits comprising CH4512, CH3711, CH3521, CH3511, CH3721, CH3431 and GS3004, normally GS3081* and 1 from (GS4083 or GS4084).</td>
</tr>
<tr>
<td><strong>Level 4(H):</strong></td>
<td>120 credits comprising 3 from (CH4511, CH4611, CH4711, CH4712 and CH5711), CH4448§, CH5515, normally GS4083 or GS4084**, GS4005, GS4010, GS4009, 1 from (GS4088, GG3067, GG3068, GG3069 and GG3082).</td>
</tr>
</tbody>
</table>

* With the approval of the Geoscience Adviser of Studies, a student may replace GS3081 and (GS4083 or GS4084) by 2 from GG3067, GG3068, GG3069, GG3082 in semester 2.

** With the approval of the Geoscience Adviser of Studies, a student may replace GS4083 or GS4084 by a second module from the list GS4088, GG3067, GG3068, GG3069 and GG3082.

§With the approval of the Directors of Teaching, under some circumstances, students might conduct an integrated 35 credit project, ID4441, combining CH4448 with GS4009 and presenting a single, extended report.

Modules

Interdisciplinary (ID) Modules

This School co-ordinates and contributes to the following inter-disciplinary modules – ID1002 Sustainability: ensuring our common future and ID2003 Science Methods. These appear in the Interdisciplinary Section of the Catalogue (Section 21)

Geography (GE) Modules

GE1001 The Foundations of Geography

Credits: 20.0 Semester: 1

Description: This module provides a general introduction to Human and Physical Geography. Some basic concepts of Human Geography - space and place, location and scale, distance and difference - are introduced and used to examine the nature of the human environment. Both contemporary and historical examples allow an exploration of these issues in a British setting, in an urban setting and in relation to world geographies. The Physical Geography component introduces the characteristics of global environmental systems: the lithosphere, atmosphere, hydrosphere and biosphere. These components are illustrated in the course of two one-day field trips.

Class Hour: 11.00 am
Teaching: Five lectures, one laboratory each week and 2 field days during the semester.
Assessment: Continuous Assessment = 67%, 2 Hour Examination = 33%
Re-Assessment: 2 Hour Examination = 33%, Oral Examination if continuous assessment is seriously deficient.
**Geography & Geosciences**

**GE1002  Global Environmental Problems**

Credits: 20.0  
Semester: 2

Description: This module explores the interrelationships between human activity and the physical environment in the context of the examination of some pressing global problems. The scientific, political, social and economic dimensions of such issues as population growth, global warming, desertification, food supply and the exploitation of natural resources are examined, and the potential for sustainable development is considered. The module illustrates the close interrelationship between human and physical geography and the need for a broad knowledge of both if we are to understand the nature of the global environmental problems that currently confront society.

Class Hour: 11.00 am

Teaching: Five lectures and one laboratory.

Assessment: Continuous Assessment = 67%, 2 Hour Examination = 33%

Re-Assessment: 2 Hour Examination = 33%, Oral Examination if continuous assessment is seriously deficient.

**GE2011 Geographical Processes and Change**

Credits: 30.0  
Semester: 1

Prerequisite: GE1001 and GE1002

Anti-requisites: GG2003 and GG2004

Description: This module examines some fundamental processes in human and physical geography. The physical geography component of the module considers the operation of a range of atmospheric, hydrological and geomorphological processes. Topics include hydrometeorological processes, weathering, slope processes, fluvial processes, glacial processes and periglacial processes. The human geography component of the module explores the extraordinary character of the modern world from a range of geographical perspectives. Topics include the economic, historical, political and social geography of capitalism, imperialism, urbanisation and globalisation.

Class Hour: 9.00 am Monday-Friday, 2.00 – 6.00 pm Monday

Teaching: Four lectures, two seminars, three tutorials, and two practical classes and a Field Excursion during the semester.

Assessment: Continuous Assessment = 60%, 2 Hour Examination = 40%

Re-Assessment: 2 Hour Examination = 40%, Oral Examination if continuous assessment is seriously deficient.

**GE2012 Processes, Perspectives and Ideas in Geography**

Credits: 30.0  
Semester: 2

Prerequisite: GE2001

Anti-requisites: GG2003 and GG2004

Description: The first part of the module extends the understanding of the physical and human world developed in GE2001 and explores the contemporary relevance of geography, using case studies of environmental problems and social inequalities in the developed world. The second part of the module then takes a holistic view of geography by examining some enduring themes which have fascinated geographers for centuries, before illustrating the potential for an integrated understanding of the world through a detailed case study of one world region (e.g. South Asia).

Class Hour: 9.00 am Monday-Friday, 2.00 – 6.00 pm Monday

Teaching: Four lectures, two seminars, three tutorials, one practical class.

Assessment: Continuous Assessment = 60%, 2 Hour Examination = 40%

Re-Assessment: 2 Hour Examination = 40%, Oral Examination if continuous assessment is seriously deficient.
Geography – Geoscience (GG) Modules

GG2003  Earth Surface Processes I : Environmental Systems
Credits: 10.0  Semester: 1
Prerequisites: Either GE1001 (or GG1001) and GE1002 (or GG1002), or GS1001 and GS1002
Anti-requisite: GG2001
Description: This module focuses on the fundamental physical and chemical processes operating at the earth’s surface and near subsurface. The course presents the environmental context of earth surface processes in terms of the major components of atmospheric, hydrospheric and biospheric processes. Topics covered include units and basic concepts, hydrometeorology, surface and groundwater hydrology, rock weathering and soil formation, biogeographical processes, physical oceanography and the causes and consequences of environmental change.

Class Hour: 9.00 am Monday & Tuesday, and 2.00 - 4.00pm or 4.00 - 6.00 pm Monday
Teaching: Two lectures each week, plus practical work.
Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%
Re-Assessment: 2 Hour Examination = 75%, Oral Examination if continuous assessment is seriously deficient.

GG2004  Earth Surface Processes II : Geomorphological and Sediment Systems
Credits: 10.0  Semester: 2
Prerequisite: GG2003
Anti-requisite: GG2001
Description: This module extends the understanding of the physical and chemical processes operating at the earth’s surface and near subsurface developed in GG2003. The course focuses on the operation of geomorphological processes in the overall context of sediment entrainment, transportation and deposition in a wide range of terrestrial and nearshore environments. Topics covered include earth surface sediment transport systems, physical processes of sedimentation and the operation of these processes in systems such as fluvial, glacial, coastal, hill slope and periglacial environments.

Class Hour: 9.00 am Monday & Tuesday, and 2.00 - 4.00pm or 4.00 - 6.00 pm Monday
Teaching: Two lectures each week, plus practical and fieldwork.
Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%
Re-Assessment: 2 Hour Examination = 75%, Oral Examination if continuous assessment is seriously deficient.

Geoscience (GS) Modules

GS1001  Planet Earth and its Materials
Credits: 20.0  Semester: 1
Description: The module provides an introduction to the fundamentals of the science of geology. The plate tectonic discoveries of the last 25 years provide a framework for the module which covers: (i) Introduction to geology and plate tectonics; (ii) mineralogy; (iii) igneous geology; (iv) metamorphic geology; (v) sedimentary geology; (vi) geological maps; and (vii) introductory information technology in geoscience.

Class Hour: 9.00 am
Teaching: Five lectures and one 3 hour laboratory.
Assessment: Continuous Assessment = 50%, 2 Hour Examination = 50%
Re-Assessment: Coursework = 20%, 2 Hour Examination = 80%
Geography & Geosciences

GS1002  Earth Environments & Resources
Credits: 20.0       Semester: 2
Description: The interplay between the Earth’s internal processes and external form, the evolution of the Earth and of its life forms, and human uses of Earth materials are the themes of this module. The module covers: (i) Earth structure and interior; (ii) palaeontology; (iii) Earth history; (iv) Earth resources; (v) geological maps; (vi) additional information technology in geosciences; (vii) group project exercise.
Class Hour: 9.00 am
Teaching: Five lectures and one 3 hour laboratory.
Assessment: Continuous Assessment = 50%, 2 Hour Examination = 50%
Re-Assessment: Coursework = 20%, 2 Hour Examination = 80%

GS2011  Earth Systems I: Evolutionary Geosciences
Credits: 30.0       Semester: 1
Prerequisites: GS1001 & GS1002
Anti-requisite: GS2002
Description: This module aims to provide a broad understanding of some of the natural processes that have interacted through time to shape and modify our planet and its life forms. Methods and insights from the exciting new field of Earth Systems Science will be used to comprehend the hallmark features of Earth history, biospheric and lithospheric evolution and humankind’s role in influencing environmental change. Lectures and laboratory classes are integrated with emphasis on recording and analysing geoscience information, fieldwork and presentational skills.
Class Hour: 10.00 am
Teaching: Five lectures and one 3 hour laboratory, and occasional tutorials.
Assessment: Continuous Assessment = 50%, 3 Hour Examination = 50%
Re-Assessment: Coursework = 20%, 3 Hour Examination = 80%

GS2012  Earth Systems II: Materials and Geodynamics
Credits: 30.0       Semester: 2
Prerequisites: GS1001 & GS1002
Anti-requisite: GS2001
Description: This module aims to give a broad understanding of the genesis of materials that comprise Earth and the processes that are involved in creating and modifying Earth’s surface and lithosphere. Practical tools for the systematic recognition and accurate identification of solid Earth materials are emphasised. These provide the basis to interpret the physical conditions of formation and geodynamical evolution of the Earth System through time. A residential field course in the Easter vacation provides an opportunity to visit in situ many of the features covered in this module and so helps to pull the course together.
Class Hour: 10.00 am
Teaching: Five lectures and one 3 hour laboratory, and occasional tutorials.
Assessment: Continuous Assessment = 50%, 3 Hour Examination = 50%
Re-Assessment: Coursework = 20%, 3 Hour Examination = 80%

The details of the Honours modules – that is 3000 and 4000 level modules – which relate to the programmes listed in this section, are available in the Honours Course Catalogue.
