School of Mathematics & Statistics

General degree students wishing to enter 3000-level modules and non-graduating students wishing to enter 3000-level, 4000-level or 5000-level modules must consult with the relevant Honours Adviser within the School to confirm they are permitted to enter the module.

This module continues the study of vector spaces and linear transformations begun in MT2501. It aims to show the importance of linearity in many areas of mathematics ranging from linear algebra through to geometric applications to linear operators and special functions. The main topics covered include: diagonalisation and the minimum polynomial; Jordan normal form; inner product spaces; orthonormal sets and the Gram-Schmidt process; adjoint and self-adjoint operators.

**Programme module type:** Compulsory for all MMath programmes, BSc Statistics, BSc joint Honours Statistics programmes, MPhys Mathematics and Theoretical Physics and MPhys Theoretical Physics. Optional for all other undergraduate programmes in the School of Mathematics & Statistics.

**Pre-requisite(s):** MT2001 or MT2501

**Required for:** MT4003, MT4111, MT4112, MT4501, MT4513, MT4519, MT4607, MT4608, MT4614, MT5827

**Learning and teaching methods and delivery:**

- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).
- **Scheduled learning:** 35 hours
- **Guided independent study:** 115 hours

**Assessment pattern:**

- As defined by QAA:
  - Written Examinations = 90%, Practical Examinations = 0%, Coursework = 10%
- As used by St Andrews:
  - 2-hour Written Examination = 90%, Coursework = 10%

**Re-assessment pattern:** 2-hour Written Examination = 100%

**Module coordinator:** Dr J D Mitchell

**Module teaching staff:** Dr J D Mitchell, Dr L S Theran
### MT3502 Real Analysis

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 9</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9  
**Planned timetable:** 11.00 am Mon (even weeks), Tue & Thu

This module continues the study of analysis begun in the 2000-level module MT2502 Analysis. It considers further important topics in the study of real analysis including: integration theory, the analytic properties of power series and the convergence of functions. Emphasis will be placed on rigorous development of the material, giving precise definitions of the concepts involved and exploring the proofs of important theorems. The language of metric spaces will be introduced to give a framework in which to discuss these concepts.

**Programme module type:** Compulsory for MMath Mathematics, Applied Mathematics and Pure Mathematics programmes  
Optional for all other undergraduate programmes in the School of Mathematics & Statistics.

**Pre-requisite(s):** MT2502

**Required for:** MT4004, MT4111, MT4501, MT4513, MT4519, MT5825, MT5830

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5-hours of lectures and 1 tutorial.  
**Scheduled learning:** 35 hours  
**Guided independent study:** 115 hours

**Assessment pattern:**  
**As defined by QAA:**  
Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%  
**As used by St Andrews:**  
2-hour Written Examination = 90%, Class Test = 10%

**Re-assessment pattern:**  
2-hour Written Examination = 100%

**Module coordinator:** Dr J M Fraser

**Module teaching staff:** Dr J M Fraser, TBC

### MT3503 Complex Analysis

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 9</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9  
**Planned timetable:** 12.00 noon Mon (odd weeks), Wed and Fri

This module aims to introduce students to analytic function theory and applications. The topics covered include: analytic functions; Cauchy-Riemann equations; harmonic functions; multivalued functions and the cut plane; singularities; Cauchy's theorem; Laurent series; evaluation of contour integrals; fundamental theorem of algebra; Argument Principle; Rouche's Theorem.

**Programme module type:** Compulsory for MMath Applied Mathematics, MMath Mathematics, and MMath Pure Mathematics. Optional for all other undergraduate programmes in the School of Mathematics & Statistics.

**Pre-requisite(s):** MT2502 or MT2503 or MT2001

**Required for:** MT4005, MT4111, MT4112, MT4501, MT4513, MT4519, MT4608, MT5802

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).  
**Scheduled learning:** 34 hours  
**Guided independent study:** 116 hours

**Assessment pattern:**  
**As defined by QAA:**  
Written Examinations = 90%, Practical Examinations = 0%, Coursework = 10%  
**As used by St Andrews:**  
2-hour Written Examination = 90%, Coursework = 10%

**Re-assessment pattern:**  
2-hour Written Examination = 100%

**Module coordinator:** Dr M Quick

**Module teaching staff:** Dr M Quick
### MT3504 Differential Equations

The object of this module is to provide a broad introduction to analytical methods for solving ordinary and partial differential equations and to develop students’ understanding and technical skills in this area. This module is a prerequisite for several other Honours options. The syllabus includes: existence and uniqueness of solutions to initial-value problems; non-linear ODE’s; phase-plane analysis; Green’s functions for ODE’s; Sturm-Liouville problems; first order PDE’s; method of characteristics; classification of second order linear PDE’s; method of separation of variables; characteristics and reduction to canonical form.

</tbody>
</table>

This module continues the study of algebra begun in the 2000-level module MT2505 Abstract Algebra. It places emphasis on the concept of a ring and their properties, which give insight into concepts of factorisation and divisibility. Important examples such as polynomial rings will be used to motivate and illustrate the theory developed.

<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9  
**Planned timetable:** 12.00 noon Mon (odd weeks), Wed & Fri

Differential equations are of fundamental significance in applied mathematics. This module will cover important and common techniques used to solve the partial differential equations that arise in typical applications. The module will be useful to students who wish to specialise in Applied Mathematics in their degree programme.

**Programme module type:**  
- Compulsory for MMath Applied Mathematics  
- Optional for all other undergraduate programmes in the School of Mathematics & Statistics.

**Pre-requisite(s):** MT2506 and MT3504  
**Anti-requisite(s):** MT3601

**Required for:** MT4111, MT4501

**Learning and teaching methods and delivery:**

# MT3507 Mathematical Statistics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 9</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9  
**Planned timetable:** 11.00 am Mon (odd weeks), Wed & Fri

Together with MT3508, this module provides a bridge between second year and Honours modules in statistics. It will provide students with a solid theoretical foundation on which much of more advanced statistical theory and methods are built. This includes probability generating functions and moment generating functions, as well as widely used discrete distributions (binomial, Poisson, negative binomial and multinomial) and continuous distributions (gamma, exponential, chi-squared, beta, t-distribution, F-distribution, and multivariate normal). It will also provide a foundation in methods of statistical inference (maximum likelihood and Bayesian) and model selection methods based on information theory (AIC and BIC).

**Programme module type:**  
- Compulsory for BSc/MA Statistics degrees (both single and joint Honours) and for MMath Statistics  
- Optional for all other undergraduate programmes in the School of Mathematics & Statistics.

**Pre-requisite(s):** MT2508  
**Anti-requisite(s):** MT3606

**Required for:** MT4501, MT4531, MT4537, MT4606, MT4609, MT5701, MT5751

**Learning and teaching methods and delivery:**  
- **Weekly contact:** 2.5 hours of lectures and 1 tutorial.  
- **Scheduled learning:** 35 hours  
- **Guided independent study:** 115 hours

**Assessment pattern:**  
- As defined by QAA:  
  - Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%  
  - As used by St Andrews:  
    - 2-hour Written Examination = 90%, Class Test = 10%

**Re-assessment pattern:**

Together with MT3507, this module provides a bridge between second year and Honours modules in statistics. It deals with the application of statistical methods to test hypotheses and draw inferences from data. This includes a number of nonparametric methods and statistical tests (permutation and randomization tests, goodness-of-fit tests and tests of independence). Inference methods include model fitting by least squares and maximum likelihood, and variance estimation by means of the information matrix and by bootstrap. Applications include multiple regression, analysis of variance, the general (normal) linear model and an introduction to generalized linear models and generalized additive models.

Programme module type: Compulsory for BSc/MA Statistics degrees (both single and joint Honours) and for MMath Statistics
Optional for all other undergraduate programmes in the School of Mathematics & Statistics.

Pre-requisite(s): MT2508
Anti-requisite(s): MT3606

Required for: MT4501, MT5751

Learning and teaching methods and delivery:

### MT3832 Mathematical Programming

**SCOTCAT Credits:** 15  
**SCQF Level:** 9  
**Semester:** 2

**Academic year:** 2017/8  
**Planned timetable:** 12.00 noon Mon (odd weeks), Wed and Fri

The aim of this module is to introduce students to the formulation and solution of various linear programming problems. The subject matter will be illustrated by applying the methods of solution to real examples. The syllabus includes: formulation of linear problems; solution graphically and by simplex algorithm; sensitivity analysis; duality; transportation and transshipment; the assignment problem.

**Programme module type:** Compulsory for all single and joint Honours BSc Management Science degree programmes  
Optional for all programmes in the School

**Pre-requisite(s):** MT2001 or MT2501 or (MT1002 and MN2002)

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 0.5 tutorial (weeks 2 - 11).  
**Scheduled learning:** 30 hours  
**Guided independent study:** 120 hours

**Assessment pattern:**  
**As defined by QAA:**  
Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%

**As used by St Andrews:**  
2-hour Written Examination = 100%

### MT3852 Automata, Languages and Complexity

**SCOTCAT Credits:** 15  
**SCQF Level:** 9  
**Semester:** 2

**Academic year:** 2018/9  
**Availability restrictions:** Not available to Joint Honours Mathematics and Computer Science students.

**Planned timetable:** 10.00 am Mon (even weeks) and 2.00 pm - 4.00 pm Mon

This module begins with finite state machines, context-free grammars and big-O notation. Turing machines, non-determinism and pushdown automata are introduced, followed by studies on decidability, simulation and the Halting problem. The complexity classes P, NP, co-NP, NP-hard, etc., are described via analysis of SAT and graph isomorphism. Strengths and limitations of the abstract approach to complexity are discussed, followed by an introduction to practical complexity.

**Programme module type:** Optional to all programmes in the School of Mathematics & Statistics - except Computer Science - Mathematics joint Honours

**Pre-requisite(s):** MT2504 or ((CS2001 or CS2101) and CS2002)  
**Anti-requisite(s):** CS3052

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2 hours of lectures (x 11 weeks), 0.5-hour tutorial (x 10 weeks)  
**Scheduled learning:** 27 hours  
**Guided independent study:** 123 hours

**Assessment pattern:**  
**As defined by QAA:**  
Written Examinations = 60%, Practical Examinations = 0%, Coursework = 40%

**As used by St Andrews:**  
2-hour Written Examination = 60%, Coursework = 40%

**Re-assessment pattern:**  
2-hour Written Examination = 100%

This module introduces students to group theory, which is one of the central fields of the 20th century mathematics. The main theme of the module is classifying groups with various additional properties, and the development of tools necessary in this classification. In particular, the students will meet the standard algebraic notions, such as substructures, homomorphisms, quotients and products, and also various concepts peculiar to groups, such as normality, conjugation and Sylow theory. The importance of groups in mathematics, arising from the fact that groups may be used to describe symmetries of any mathematical object, will be emphasised throughout the module.

**Programme module type:** Compulsory for MMath Pure Mathematics. At least two from MT4003, MT4004, MT4509, MT4510 and MT4606 are compulsory for MMath Mathematics. Optional for all other programmes in the School.

**Pre-requisite(s):** MT3600 or (MT2002 and MT3501) or MT2505

**Required for:** MTS823, MTS824, MTS827

**Learning and teaching methods and delivery:**

| Weekly contact: | 2.5 lectures (weeks 1 - 10), 1 tutorial and 1 examples class (weeks 2 - 11). |
| Scheduled learning: | 45 hours |
| Guided independent study: | 105 hours |

This module continues the development of real analysis that was begun in MT2502 and continued through MT3502. Topics covered will include limits and continuity in metric spaces, differentiation in higher dimensions and the theoretical underpinning of Fourier series. This module will present some of the highlights of the study of analysis, such as Baire's Category Theorem, the Contraction Mapping Theorem, the Weierstrass Approximation Theorem, and the Inverse Function Theorem.

| Programme module type: | Compulsory for M.Math. Pure Mathematics. At least two from MT4003, MT4004, MT4509, MT4510 and MT4606 compulsory for M.Math. Mathematics. Optional for all other programmes in the School. |

</tbody>
</table>

This module gives an introduction to wave motion and its importance in many areas of applied mathematics. It begins with a discussion of the linear approximation for small amplitude waves and discusses properties of these such as dispersion relations, phase and group velocities, dissipation and dispersion. Some nonlinear effects such as wave steepening are then treated and an introduction given to some of the equations, for example Burger's and Korteweg de Vries, which are used to model nonlinear wave propagation.

| Programme module type: | Compulsory for MMath Applied Mathematics. Optional for all other programmes in the School. |
| Pre-requisite(s): | (MT2003 or MT2506 or PH3081) and (MT3503 or MT3504) |

</tbody>
</table>

This module aims to enable students to use a computer as a tool in their other modules and to turn naturally to a computer when solving mathematical problems. The module aims to illustrate the following points: computation allows one to conduct mathematical experiments; computation allows one to collect data about a problem being studied. This is similar to the way other scientists work. It is easier to try several different approaches to a problem and see which works. The computer is not intelligent; intelligence comes from the user. The user thinks, the user interprets, the computer calculates.

Programme module type: At least one of MT4111, MT4112 and MT5611 compulsory for MMath Applied Mathematics and MMath Pure Mathematics
At least one of MT3607, MT4111, MT4113 and MT5611 compulsory for MMath Mathematics
At least one of MT3607, MT4111 and MT4113 compulsory for BSc/MA Mathematics and BSc/MA Statistics
Optional for all other programmes in the School.

Pre-requisite(s): Any of MT3501 - MT3506
Anti-requisite(s): MT5611

Learning and teaching methods and delivery:
Weekly contact: 2.5 lectures (weeks 1 - 10) and 1 practical session (weeks 2 - 11)
Scheduled learning: 35 hours
Guided independent study: 115 hours

Assessment pattern:
As defined by QAA:
Written Examinations = 70%, Practical Examinations = 0%, Coursework = 30%

As used by St Andrews:
2-hour Written Examination = 70%, Coursework = 30%

Re-assessment pattern:
2-hour Written Examination = 100%

Module coordinator: Dr J D Mitchell

Module teaching staff: Dr J D Mitchell, Dr C M Roney-Dougal, Dr L Theran
This module is intended to introduce students to FORTRAN and the writing of computer codes to implement mathematical algorithms. The module includes a basic introduction to FORTRAN, and the implementation of mathematical algorithms in a well-documented FORTRAN program. Students are required to complete a project in addition to sitting the examination.

Programme module type: At least one of MT4111, MT4112 and MT5611 compulsory for MMath Applied Mathematics and MMath Pure Mathematics
At least one of MT3607, MT4111, MT4113 and MT5611 compulsory for MMath Mathematics
At least one of MT3607, MT4111 and MT4113 compulsory for BSc/MA Mathematics and BSc/MA Statistics
Optional for all other programmes in the School.

Pre-requisite(s): either pre- or co-requisites MT3501, MT3503 or MT3504

Anti-requisite(s): MT5612, Honours or Joint Honours Programme in Computer Science.

Required for: MT5806

Learning and teaching methods and delivery: Weekly contact: 2.5 lectures (weeks 1 - 10).

Scheduled learning: 25 hours
Guided independent study: 125 hours

Assessment pattern: As defined by QAA:
Written Examinations = 70%, Practical Examinations = 0%, Coursework = 30%

As used by St Andrews:
2-hour Written Examination = 70%, Coursework: Project = 30%

Re-assessment pattern: 2-hour Written Examination = 100%

Module coordinator: Prof D H Mackay

Module teaching staff: Prof D H Mackay, Dr T Elsden
The aim of this module is to teach computer programming skills, including principles of good programming practice, with an emphasis on statistical computing. Practical work focusses on the widely-used statistical language and environment R. Practical skills are developed through a series of computing exercises that include (1) modular programming; (2) manipulating data; (3) simulating data with specific statistical properties, (4) investigating behaviour of statistical procedures under failure of statistical assumptions.
### MT4501 Topics in the History of Mathematics

<table>

</table>

The object of this module is to introduce students to some of the ideas and mathematical techniques used in understanding the behaviour of dynamical systems that obey Newton's Laws. These notions are arguably the foundations of physics and applied mathematics. The module will include: Newton's laws of motion; conservative forces; central forces; non-inertial/accelerating frames of reference; dynamics of a system of particles; mechanics of a rigid body; Euler's equations; Lagrange's equations; Hamilton's equations.

| Programme module type: | Optional for all programmes in the School | | | |
|------------------------|-------------------------------------------|-------------------|--------------------------|
| **Pre-requisite(s):** | (MT2003 or MT2503 or PH3081) and MT3504 | | | |

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module provides an introduction to the theory of incompressible fluid dynamics, which describes the motion of liquids and gases at speeds small compared to the sound speed. Special attention is paid to a precise foundation of the various conservation laws that govern fluid dynamics, as this provides a convenient framework in which to study specific examples as well as extensions of the basic theory.

**Programme module type:** Compulsory for MMath Applied Mathematics.

- At least two from MT4003, MT4004, MT4509, MT4510 and MT4606 compulsory for MMath Mathematics.
- Optional for all other programmes in the School.

**Pre-requisite(s):** (MT2506 and MT3504) or MT3601 **Required for:** MT5809

**Learning and teaching methods and delivery:**

- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).
- **Scheduled learning:** 35 hours
- **Guided independent study:** 115 hours

**Assessment pattern:**

- As defined by QAA:
  - Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%
- As used by St Andrews:
  - Written Examination = 100% (2-hour final exam = 90%, class test = 10%)

**Re-assessment pattern:**

- 2-hour Written Examination = 100%

This module is designed to introduce students to asymptotic methods used in the construction of analytical approximations to integrals and solutions of differential equations.

Programme module type: Optional for all programmes in the School

Pre-requisite(s): MT3504

Learning and teaching methods and delivery:

**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).

**Scheduled learning:** 34 hours

**Guided independent study:** 116 hours

Assessment pattern:

**As defined by QAA:**
Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%

**As used by St Andrews:**
2-hour Written Examination = 100%

Re-assessment pattern:

2-hour Written Examination = 100%

Module coordinator: Dr A Wilmot-Smith

Module teaching staff: Dr A Wilmot-Smith
### MT4513 Fractal Geometry

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 10</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8  
**Planned timetable:** 12.00 noon Mon (even weeks), Tue and Thu

The aim of this module is to introduce the mathematics used to describe and analyse fractals and to show how the theory may be applied to examples drawn from across mathematics and science. The module discusses the philosophy and scope of fractal geometry; and may include topics such as dimension, representation of fractals by iterated function systems, fractals in other areas of mathematics such as dynamical systems and number theory, Julia sets and the Mandelbrot set.

**Programme module type:** Optional for all programmes in the School.  
**Pre-requisite(s):** (MT2503 or MT2001) and any one of MT3501 - MT3504  
**Anti-requisite(s):** MT5813

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).  
**Scheduled learning:** 35 hours  
**Guided independent study:** 115 hours

**Assessment pattern:** As defined by QAA:  
Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%

**As used by St Andrews:**  
2-hour Written Examination = 100%

**Re-assessment pattern:** 2-hour Written Examination = 100%

**Module coordinator:** Prof K J Falconer

**Module teaching staff:** Prof K J Falconer

### MT4514 Graph Theory

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 10</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Academic year:** 2018/9  
**Planned timetable:** 10.00 am Mon (even weeks), Tue and Thu

The aim of this module is to introduce students to the study of graph theory as a tool for representing connections between data. Topics to be covered may include: basic theory and applications, Eulerian graphs, Hamiltonian graphs, planar graphs, spanning trees and applications, networks, matching problems.

**Programme module type:** Optional for all programmes in the School.  
**Pre-requisite(s):** MT1003 or MT2504 or MT2005  
**Required for:** MT5821

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).  
**Scheduled learning:** 35 hours  
**Guided independent study:** 115 hours

**Assessment pattern:** As defined by QAA:  
Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%

**As used by St Andrews:**  
2-hour Written Examination = 100%

**Re-assessment pattern:** 2-hour Written Examination = 100%

**Module coordinator:** Prof N Ruskuc

**Module teaching staff:** Prof N Ruskuc
### MT4515 Functional Analysis

<table>
<thead>

<td>12.00 noon Mon (even weeks), Tue and Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This object of this module is to familiarise students with the basic notions of functional analysis, that is analysis on normed spaces and Hilbert space. The module will cover normed spaces, convergence and completeness, operators, Hilbert spaces and may include topics such as spectral theory and the Hahn-Banach theorem.

<table>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module introduces the ideas of metric and topological spaces. A metric space is simply a set together with a 'distance' between any two points. This idea is pervasive in mathematics: from situations such as the usual distance in n-dimensional space, to the Hamming distance between words in an error-correcting code and the distance between functions approximating a given function. Metric spaces can be thought of as particular instances of topological spaces, where the fundamental concept is that of points being 'close' to each other rather than the precise distance between points. Topological spaces are a powerful generalisation of metric spaces, and have had a profound influence in the development of mathematics. Many examples of metric spaces and topological spaces will be introduced and fundamental ideas within topology will be discussed, including separation axioms, compactness and connectedness.

Programme module type: Optional for all programmes in the School.

Pre-requisite(s): MT2002 or MT2502 or MT3600 or MT4004

Learning and teaching methods and delivery:
- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).
- **Scheduled learning:** 35 hours
- **Guided independent study:** 115 hours

<th>SCQF Level</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8  
**Planned timetable:** 11.00 noon Mon (even weeks), Tue and Thu

This module provides an introduction to the theory of stochastic processes and to their use as models, including applications to population processes and queues. The syllabus includes the Markov property, Chapman-Kolmogorov equations, classification of states of Markov chains, decomposition of chains, stationary distributions, random walks, branching processes, the Poisson process, birth-and-death processes and their transient behaviour, embedded chains, Markovian queues and hidden Markov models.

**Programme module type:** At least two from MT3706, MT4527, MT4528, MT4608 compulsory for BSc Management Science (single Honours).  
Optional for all undergraduate programmes in the School of Mathematics & Statistics.

**Pre-requisite(s):** MT2504 or MT2004  
**Anti-requisite(s):** MT3706

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 8 tutorials over the semester.  
**Scheduled learning:** 33 hours  
**Guided independent study:** 117 hours

**Assessment pattern:**  
As defined by QAA:  
Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%  
As used by St Andrews:

</thead>
<tbody>
<tr>
<td>Academic year:</td>
<td>2017/8 &amp; 2018/9</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Planned timetable:</td>
<td>10.00 am Mon (even weeks), Tue and Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module is intended to offer a re-examination of standard statistical problems from a Bayesian viewpoint and an introduction to recently developed computational Bayes methods. The syllabus includes Bayes' theorem, inference for Normal samples; univariate Normal linear regression; principles of Bayesian computational, Markov chain Monte Carlo - theory and applications.

| Programme module type: | At least two of MT4531 (or MT5831), MT4608 and MT4609 compulsory for BSc Statistics. |
|                        | MT4531 or MT4606 (or MT5831 or MT5701) compulsory for BSc/MA joint Honours Statistics programmes. |
|                        | Optional for all other undergraduate programmes in the School of Mathematics & Statistics. |
| Pre-requisite(s):      | MT3507 or MT3606 |
| Anti-requisite(s):     | MT5831 |

| Learning and teaching methods and delivery: | Weekly contact: 24 lectures and 7 practical classes over the semester. |
|                                           | Scheduled learning: 31 hours |
|                                           | Guided independent study: 119 hours |

| Assessment pattern: | As defined by QAA: |
|                    | Written Examinations = 80%, Practical Examinations = 0%, Coursework = 20% |
|                    | As used by St Andrews: |
|                    | 2-hour Written Examination = 80%, Coursework = 20% |

### MT4537 Spatial Processes

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 10</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Academic year:</strong></td>
<td>2017/8</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Planned timetable:</strong></td>
<td>10.00 am Mon (even weeks), Tue and Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module will study probabilistic and inferential problems for spatial processes. It commences with a discussion on different types of spatial data. In the context of spatial point processes functional and non-functional summary characteristics for point patterns are considered. Spatial point process models, including homogeneous and inhomogeneous Poisson processes as well as Gibbs processes and Cox processes along with the approaches to parameter estimation and model evaluation, are introduced. Models in geostatistics based on empirical variograms and kriging approaches and spatial models for lattice data (CAR model, Gauss Markov random fields) are also discussed.

<table>

### MT4539 Quantitative Risk Management

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Academic year:</strong></td>
<td>2017/8</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Planned timetable:</strong></td>
<td>12.00 noon Wed, Fri and odd Mon, and 2.00 pm Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The module introduces the concept of financial risk and discusses the importance of its regulation. The emphasis is laid on the popular risk measure Value at Risk (VaR). After a brief discussion on asset returns, various modelling techniques - ranging from the simple Historical Simulation to the more advanced ARMA and GARCH models - are presented and applied for the calculation of VaR using real financial data. The aim of this module is to provide a solid basis in risk management for those students considering a career in finance.

<table>
<thead>
<tr>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module will explore real world applications of mathematics to biological problems e.g. harvesting of fish stocks, host-parasitoid systems, predator-prey dynamics, molecular interactions. The mathematical techniques used in the modelling will be nonlinear difference equations and ordinary differential equations. The module will be useful to students who wish to specialise in Applied Mathematics in their degree programme.

<table>
<thead>
<tr>
<th>Programme module type:</th>

MT4553 Theory of Electric and Magnetic Fields

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 10</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2018/9

**Planned timetable:**
10.00 am Mon (odd weeks), Wed, Fri

The module will consider the mathematical and physical principles that describe the theory of electric and magnetic fields. It will first describe the basic principles of electrostatics and magneto-statics and following this electrodynamics. Next Maxwell's equations are described along with the properties of electro-magnetic waves in a variety of media. Finally an application to the area of plasma physics is carried out through considering the orbits of charged particles in a variety of spatially and time varying magnetic fields.

**Programme module type:** Optional for all programmes within the School of Mathematics & Statistics (except Joint Mathematics and Physics or Mathematics and Theoretical Physics)

**Pre-requisite(s):** MT2503, MT2506 and MT3504

**Anti-requisite(s):** PH3007

**Learning and teaching methods and delivery:**

Weekly contact: 2.5 hours of lectures (x 10 weeks), 1-hour tutorial (x 10 weeks)

Scheduled learning: 35 hours

Guided independent study: 120 hours

**Assessment pattern:**

As defined by QAA:
Written Examinations = 90%, Practical Examinations = 0%, Coursework = 10%

As used by St Andrews:
2-hour Written Examination = 90%, Coursework (class test) = 10%

**Re-assessment pattern:**
2-hour Written Examination = 100%

**Module coordinator:** Dr D Mackay

**Module teaching staff:** Dr D Mackay

MT4599 Project in Mathematics / Statistics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 10</th>
<th>Semester:</th>
<th>Whole Year</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9

**Availability restrictions:** Available only to students in the final year of a BSc/MA Honours degree programme in the School

**Planned timetable:** none

The student will choose a project from a list published annually although a topic outwith the list may be approved. Students will be required to report regularly to their supervisor and a report of no more than 5,000 words must be submitted by the end of the April.

**Programme module type:** Compulsory for BSc/MA Mathematics, BSc/MA Statistics, all BSc/MA joint Honours Mathematics programmes (including Mathematics ‘with’ degrees) and all BSc/MA joint Honours Statistics programmes

**Learning and teaching methods and delivery:**

Weekly contact: Typically and on average, 20 mins of project supervisions per week over whole year.

Scheduled learning: 8 hours

Guided independent study: 142 hours

**Assessment pattern:**

As defined by QAA:
Written Examinations = 0%, Practical Examinations = 20%, Coursework = 80%

As used by St Andrews:
Coursework = 100%; Project = 80%, Presentation = 20%

**Re-assessment pattern:**
Resubmission of project = 100%

**Module coordinator:** Prof C E Parnell
### MT4606 Statistical Inference

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 10</th>
<th>Semester:</th>
<th>2</th>

</thead>
<tbody>
<tr>
<td><strong>Academic year:</strong></td>
<td>2017/8</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Planned timetable:</strong></td>
<td>10.00 am Mon (odd weeks), Wed and Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module aims to show how the methods of estimation and hypothesis testing met in 2000- and 3000-level Statistics modules can be justified and derived; to extend those methods to a wider variety of situations. The syllabus includes: comparison of point estimators; the Rao-Blackwell Theorem; distribution theory; Fisher information and the Cramer-Rao lower bound; maximum likelihood estimation; hypothesis-testing; confidence sets.

**Programme module type:** Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT3507 or MT3606

**Anti-requisite(s):** MT5701

**Learning and teaching methods and delivery:**

- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 0.5 tutorial (weeks 2 - 11).
- **Scheduled learning:** 30 hours
- **Guided independent study:** 120 hours

**Assessment pattern:**

- **As defined by QAA:** Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%
- **As used by St Andrews:** 2-hour Written Examination = 100%

**Re-assessment pattern:** 2-hour Written Examination = 100%

**Module coordinator:** Prof A G Lynch

### MT4607 Generalised Linear Models and Data Analysis

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level 10</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Academic year:</strong></td>

<td></td>
<td></td>
</tr>
<tr>
<td><strong>Planned timetable:</strong></td>
<td>9.00 am Mon (even weeks), Tue and Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module aims to demonstrate the power and elegance of unifying a large number of simple statistical models within the general framework of the generalised linear model. It will train students in the interpretation, analysis and reporting of data, when a single response measurement is interpreted in terms of one or a number of other variables.

**Programme module type:** MT4607 (or MT5753) compulsory for BSc/MA single and joint Honours Statistics. Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** (MT2001 or MT2503), (MT2004 or MT2508) and either pre- or co-requisite MT3501

**Anti-requisite(s):** MT5753

**Learning and teaching methods and delivery:**

- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 8 tutorials over the semester
- **Scheduled learning:** 33 hours
- **Guided independent study:** 117 hours

**Assessment pattern:**

- **As defined by QAA:** Written Examinations = 80%, Practical Examinations = 0%, Coursework = 20%
- **As used by St Andrews:** 2-hour Written Examination = 80%, Coursework: Project = 20%

**Re-assessment pattern:** 2-hour Written Examination = 100%

**Module coordinator:** Dr M Papathomas

**Module teaching staff:** Dr M Papathomas
### MT4608 Sampling Theory

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>15</th>
<th>SCQF Level: 10</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Academic year:</td>
<td>2018/9</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Planned timetable:</td>
<td>10.00 am Mon (odd weeks), Wed and Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The aims of this module are to introduce students to and interest them in the principles and methods of design-based inference, to convince them of the relevance and utility of the methods in a wide variety of real-world problems, and to give them experience in applying the principles and methods themselves. By the end of the module students should be able to recognise good and poor survey design and analysis, to decide upon and implement the main types of survey design in relatively straightforward settings, and analyse the resulting survey data appropriately. The syllabus includes fundamentals of design based vs model-based inference, simple random sampling, sampling with replacement, ratio and regression estimators, stratified sampling, cluster sampling and unequal probability sampling.

**Programme module type:** MT4527 or MT4608 is compulsory for MMath Statistics.
At least two of MT4531 (or MT5831), MT4608 and MT4609 are compulsory for BSc Statistics.
At least two from MT3706, MT4527, MT4528, MT4608 are compulsory for BSc Management Science (single Honours).
Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT2004 or MT2508

**Co-requisite(s):** either pre or co-requisite: One of MT3501, MT3503, MT3504, MT3606 or any 3000-level MN module

**Learning and teaching methods and delivery:**

<table>
<thead>

<tr>
<td><strong>Planned timetable:</strong></td>
<td>To be arranged.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The dissertation must consist of approximately 6,000 words of English prose on a topic agreed between the student and two appropriate members of staff (who act as supervisors). The topic does not have to relate to work covered in previous Honours modules, though it may be helpful to the student if it builds on previous work. The topic and range of sources should be chosen in consultation with the supervisors in order to determine that the student has access to sources as well as a clear plan of preparation.

(Guidelines for printing and binding dissertations can be found at: http://www.st-andrews.ac.uk/printanddesign/dissertation/)

### MT5611 Advanced Symbolic Computation

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2018/9  
**Planned timetable:** 9.00 am Mon (odd weeks), Wed and Fri  

This module aims to enable students to use a computer as a tool in their other modules and to turn naturally to a computer when solving mathematical problems. The module aims to illustrate the following points: computation allows one to conduct mathematical experiments; computation allows one to collect data about a problem being studied. This is similar to the way other scientists work. It is easier to try several different approaches to a problem and see which works. The computer is not intelligent; intelligence comes from the user. The user thinks, the user interprets, the computer calculates. Students will undertake a more substantial project than that required for MT4111.

**Programme module type:**  
At least one of MT4111, MT4112 and MT5611 compulsory for MMath Applied Mathematics and MMath Pure Mathematics.  
At least one of MT3607, MT4111, MT4113 and MT5611 compulsory for MMath Mathematics.  
Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):**  
At least one MT4000-level module  

**Anti-requisite(s):** MT4111

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 practical session (weeks 2 - 11).  
**Scheduled learning:** 35 hours  
**Guided independent study:** 165 hours

**Assessment pattern:**  
As defined by QAA:  
Written Examinations = 55%, Practical Examinations = 0%, Coursework = 45%  

As used by St Andrews:  
2-hour Written Examination = 55%, Coursework: Project = 45%

**Re-assessment pattern:**  
2-hour Written Examination = 100%

### MT5701 Advanced Statistical Inference

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level: 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8  
**Planned timetable:** 10.00 am Mon (odd weeks), Wed and Fri  

This module consists of MT4606 with the addition of directed reading on more advanced aspects of the subject and a requirement to write a review essay on an aspect of the subject. The syllabus includes: comparison of point estimators; the Rao-Blackwell Theorem; distribution theory; Fisher information and the Cramer-Rao lower bound; maximum likelihood estimation; hypothesis-testing; confidence sets.

**Programme module type:**  
MT5701 or MT5831 is compulsory for MMath Statistics  
Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):**  
(MT3507 or MT3606) and any MT4000-level module  

**Anti-requisite(s):** MT4606

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 0.5 tutorial (weeks 2 - 11).  
**Scheduled learning:** 30 hours  
**Guided independent study:** 170 hours

**Assessment pattern:**  
As defined by QAA:  
Written Examinations = 75%, Practical Examinations = 0%, Coursework = 25%  

As used by St Andrews:  
2-hour Written Examination = 75%, Coursework: Project = 25%

**Re-assessment pattern:**  
2-hour Written Examination = 100%

**Module coordinator:** Prof A G Lynch

The module will introduce students to the main types of survey method for wildlife populations. It will cover simple methods in some detail and provide students with a conceptual framework for building understanding of more advanced methods. By the end of the course, students will be able to identify an appropriate assessment method for a given population, be able to design a simple survey to assess the population, and perform simple analyses of survey data. Students will get experience in using the methods via computer practical sessions involving design and analyses of surveys conducted by computer simulation.

Programme module type:
- At least two of MT5751, MT5752, MT5757, MT5758 and ID5059 compulsory for MMath Statistics.
- At least 60 credits from MT5751 - MT5753, MT5757, MT5758, MT5802, MT5806, MT5809, MT5810, MT5821, MT5823 - MT5830, MT5836, MT5852 and MT5990 compulsory for MMath Mathematics.
- Optional for all other undergraduate programmes in the School.

Pre-requisite(s):
- (MT3507 or MT3508 or MT3606) and any MT4000-level module

Learning and teaching methods and delivery:
- Weekly contact: 1.5 hrs lecture, 1 hr practical, 0.5 hr tutorial (weeks 1 - 10)
- Scheduled learning: 30 hours
- Guided independent study: 120 hours

Assessment pattern:
- As defined by QAA:
  - Written Examinations = 50%, Practical Examinations = 0%, Coursework = 50%
- As used by St Andrews:
  - 2-hour Written Examination = 50%, Coursework = 50%

Re-assessment pattern:
- 2-hour Written Examination = 100%

Module coordinator: Prof D L Borchers

Module teaching staff: Prof D L Borchers, Prof S T Buckland, Dr E Rexstad

This applied statistics module covers the main aspects of linear models (LMs) and generalized linear models (GLMs). In each case the course describes model specification, various options for model selection, model assessment and tools for diagnosing model faults. Common modelling issues such as collinearity and residual correlation are also addressed, and as a consequence of the latter the Generalized Least squares (GLS) method is described. The GLM component has emphasis on models for count data and presence/absence data while GLMs for multinomial (sometimes called choice-based models) are also covered for nominal and ordinal response outcomes. The largest part of the course material is taught inside an environmental impact assessment case study with reality-based research objectives. Political and medical examples are used to illustrate the multinomial models.

This module covers modern modelling methods for situations where the data fails to meet the assumptions of common statistical models and simple remedies do not suffice. This represents a lot of real world data. Methods covered include: nonlinear models; basic splines and Generalised Additive Models; LASSO and the Elastic Net; models for non-independent errors and random effects. Pragmatic data imputation is covered with associated issues. Computer intensive inference is considered throughout. Practical applications build sought-after skills in R and the commercial packages SAS.

**Programme module type:** At least two of MT5751, MT5752, MT5757, MT5758 and ID5059 compulsory for MMath Statistics. At least 60 credits from MT5751 - MT5753, MT5757, MT5758, MT5802, MT5806, MT5809, MT5810, MT5823 - MT5830, MT5852 and MT5990 compulsory for MMath Mathematics. Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT4607 or MT5753

**Learning and teaching methods and delivery:**
- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 8 tutorials over the semester.

## MT5806 Advanced Computational Techniques

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9  
**Planned timetable:** 12.00 noon Mon (even weeks), Tue and Thu

This module introduces students to some of the ideas, techniques and constraints that underpin modern approaches to the numerical modeling of physical processes that may be described by partial differential equations. Students will gain expertise in implementing standard methods and will submit a short dissertation together with a portfolio of computational work.

**Programme module type:** At least three from MT5802, MT5806, MT5809, MT5810, MT5852 and MT5990 compulsory for MMath Applied Mathematics.  
At least 60 credits from MT5751 - MT5753, MT5757, MT5758, MT5802, MT5806, MT5809, MT5810, MT 5821, MT5823 - MT5830, MT5836, MT5852 and MT5990 compulsory for MMath Mathematics.  
Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT3802 and MT4112

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2 lectures (weeks 1 - 10) and a typical average of 0.5 hours of project supervisions (weeks 2 - 11)  
**Scheduled learning:** 25 hours  
**Guided independent study:** 175 hours

**Assessment pattern:**  
As defined by QAA:  
Written Examinations = 0%, Practical Examinations = 0%, Coursework = 100%  
As used by St Andrews:  
Coursework = 100%

**Re-assessment pattern:** Resubmission of projects = 100%

### MT5809 Advanced Fluid Dynamics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9  
**Planned timetable:** 11.00 am Mon (odd weeks), Wed and Fri

This module will examine current research in fluid dynamics, with a particular focus on meteorology and oceanography. The large-scale atmosphere and oceans behave quite unlike a 'classical' fluid owing to the presence of stable density stratification and rotation. As a result, the fluid motion is dominated by slow, 'vortical' or eddying motions (like cyclones) which generally spin slower than the Earth. Superimposed on this slow motion are relatively fast wave-like motions analogous to surface waves on a pond. These lectures describe the mathematical basis of these fundamentally different types of motion, and furthermore illustrate the increasingly important role of computer modelling in this research.

**Programme module type:**  
At least three from MT5802, MT5806, MT5809, MT5810, MT5852 and MT5990 compulsory for MMath Applied Mathematics.  
At least 60 credits from MT5751 - MT5753, MT5757, MT5758, MT5802, MT5806, MT5809, MT5810, MT 5821, MT5823 - MT5830, MT5836, MT5852 and MT5990 compulsory for MMath Mathematics.  
Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT4509

**Learning and teaching methods and delivery:**  
**Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).  
**Scheduled learning:** 35 hours  
**Guided independent study:** 165 hours

**Assessment pattern:**  
As defined by QAA:  
Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%  
As used by St Andrews:  
2.5-hour Written Examination = 100%

Combinatorics underlies and interacts many topics in discrete mathematics including group theory, statistical design, and statistical mechanics, as well as being a lively subject in its own right. The module will give students a good grounding in the techniques and will engage students with research-level problems. It is designed to make a wide area of combinatorics available to students.

Programme module type: At least three from MT5821, MT5823 - MT5830, MT5836 and MT5990 compulsory for MMath Pure Mathematics.
At least 60 credits from MT5751 - MT5753, MT5757 - MT5759, MT5802, MT5806, MT5809, MT5810, MT 5821, MT5823 - MT5830, MT5836, MT5852 and MT5990 and ID5059 compulsory for MMath Mathematics.
Optional for all other undergraduate programmes in the School.

Pre-requisite(s): MT4514 or MT4516

Learning and teaching methods and delivery: Weekly contact: 2.5-hour lectures (weeks 1 - 10) and 1-hour tutorial (weeks 2 - 11).

</table>

The general aim of this module is to introduce students to semigroup theory, which is the study of sets with one associative binary operation defined on them. In the process, the common aims and concerns of abstract algebra will be emphasised and illustrated by drawing comparisons between semigroups, groups and rings.

Programme module type: At least three from MT5821, MT5823 - MT5836 and MT5990 compulsory for MMath Pure Mathematics. At least 60 credits from MT5751 - MT5753, MT575 - MT5759, MT5802, MT5806, MT5809, MT5810, MT5821, MT5823 - MT5830, MT5836, MT5852, MT5990 and ID5059 compulsory for MMath Mathematics. Optional for all other undergraduate programmes in the School.

Pre-requisite(s): MT4003 or MT3505 or MT4517

Learning and teaching methods and delivery: Weekly contact: 2.5 lectures (weeks 1 - 10), 1 tutorial and 1 examples class (weeks 2 - 11).

Scheduled learning: 45 hours Guided independent study: 155 hours

Assessment pattern: As defined by QAA: Written Examinations = 75%, Practical Examinations = 0%, Coursework = 25%

The overall aim of this module is to build on the foundations established in MT4003/MT4603, and take the students further into this important and beautiful branch of mathematics. More specifically, through a selection of topics, some of which will be of current research interest in St Andrews, it will introduce students to advanced techniques of handling groups and classifying them.

Programme module type: At least three from MT5821, MT5823 - MT5836 and MT5990 compulsory for MMath Pure Mathematics. At least 60 credits from MT5751 - MT5753, MT575 - MT5759, MT5802, MT5806, MT5809, MT5810, MT5821, MT5823 - MT5830, MT5836, MT5852, MT5990 and ID5059 compulsory for MMath Mathematics. Optional for all other undergraduate programmes in the School.

Pre-requisite(s): MT4003

Learning and teaching methods and delivery: Weekly contact: 2.5 lectures (weeks 1 - 10), 1 tutorial and 1 examples class (weeks 2 - 11).

Scheduled learning: 45 hours Guided independent study: 155 hours

Assessment pattern: As defined by QAA: Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%

As used by St Andrews: 2.5-hour Written Examination = 100%

Re-assessment pattern: 2-hour Written Examination = 100%

### MT5825 Measure and Probability Theory

<table>
<thead>
<tr>
<th>SCOTCAT Credits</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester</th>
<th>1</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9

**Planned timetable:** 11.00 am Mon (odd weeks), Wed and Fri

This module introduces some of the powerful techniques and ideas of modern mathematical analysis and mathematical probability theory that are important both in analysis in its own right and in its many applications in mathematics and science. The module will include topics such as: measure theory, the mathematical foundations for probability theory, law of large numbers. Mathematical analysis and the use of probabilistic methods in analysis is one of the active research areas within the School, and the choice of topics will reflect current activity.

**Programme module type:** At least three from MT5821, MT5823 - MT5830, MT5836 and MT5990 compulsory for MMath Pure Mathematics.

At least 60 credits from MT5751 - MT5753, MT575 - MT5759, MT5802, MT5806, MT5809, MT5810, MT5821, MT5823 - MT5830, MT5836, MT5852, MT5990 and ID5059 compulsory for MMath Mathematics.

Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT3502 or MT4004

**Learning and teaching methods and delivery:**
- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).
- **Scheduled contact:** 35 hours
- **Guided independent study:** 165 hours

**Assessment pattern:**
- As defined by QAA:
  - Written Examinations = 75%, Practical Examinations = 0%, Coursework = 25%
- As used by St Andrews:
  - 2-hour Written Examination = 75%, Coursework = 25%

**Re-assessment pattern:**
- 2-hour Written Examination = 100%

**Module coordinator:** Prof L Olsen

### MT5827 Lie Algebras

<table>
<thead>
<tr>
<th>SCOTCAT Credits</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8

**Planned timetable:** 11.00 am Mon (odd weeks), Wed and Fri

The aim of this module is to classify the semi-simple Lie algebras over an algebraically closed field. Lie algebra has important applications to theoretical physics and is used in the classification of finite simple groups.

**Programme module type:** At least three from MT5821, MT5823 – MT5830, MT5836 and MT5990 compulsory for MMath Pure Mathematics. At least 60 credits from MT5751 – MT5753, MT575 – MT5759, MT5802, MT5806, MT5809, MT5810, MT5821, MT5823 – MT5830, MT5836, MT5990 and ID5059 compulsory for MMath Mathematics.

Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT3501 and (MT3505 or MT4003 or MT4517)

**Learning and teaching methods and delivery:**
- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).
- **Scheduled contact:** 35 hours
- **Guided independent study:** 165 hours

**Assessment pattern:**
- As defined by QAA:
  - Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%
- As used by St Andrews:
  - 2.5-hour Written Examination = 100%

**Re-assessment pattern:**
- 2-hour Written Examination = 100%

### MT5830 Topics in Geometry and Analysis

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2018/9  
**Planned timetable:** 10.00 am Mon (odd weeks), Wed and Fri

The module will present new developments in geometry and analysis that relate to research interests in St Andrews. Building on 4000-level modules in analysis, it will introduce students to advanced results in this beautiful and important area of mathematics. The choice of specific topics may vary from year to year but will be chosen from Geometric Measure Theory, Non-commutative Geometry, Fuchsian Groups, Harmonic Analysis, and Measurable Dynamics.

**Programme module type:** At least three from MT5821, MT5823 – MT5830, MT5836 and MT5990 compulsory for MMath Pure Mathematics. At least 60 credits from MT5751 – MT5753, MT575 – MT5759, MT5802, MT5806, MT5809, MT5810, MT5821, MT5823 – MT5830, MT5836, MT5990 and ID5059 compulsory for MMath Mathematics. Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT3502 or MT4004 or MT4515

**Anti-requisite(s):** MT5828

**Learning and teaching methods and delivery:** Weekly contact: 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).  
Scheduled learning: 35 hours  
Guided independent study: 165 hours

**Assessment pattern:**  
As defined by QAA:  
Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%

As used by St Andrews:  
2.5-hour Written Examination = 100%

**Re-assessment pattern:**  
2-hour Written Examination = 100%

**Module coordinator:** Dr M Todd

**Module teaching staff:** Dr M Todd

### MT5831 Advanced Bayesian Inference

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>20</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>1</th>
</tr>
</thead>
</table>

**Academic year:** 2017/8 & 2018/9  
**Planned timetable:** 10.00 am Mon (even weeks), Tue and Thu

This module consists of MT4531 with an additional project which will give consideration to some more advanced aspects of the theory or to the application of Bayesian techniques. This may involve either directed reading or the use of the computer for simulation or data-based analyses. The syllabus includes Bayes’ theorem, inference for Normal samples; univariate Normal linear regression; principles of Bayesian computational, Markov chain Monte Carlo - theory and applications.

**Programme module type:** MT5701 or MT5831 is compulsory for MMath Statistics. Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT3507 or MT3606

**Anti-requisite(s):** MT4531

**Learning and teaching methods and delivery:** Weekly contact: 24 lectures and 7 practical classes over semester.  
Scheduled learning: 31 hours  
Guided independent study: 169 hours

**Assessment pattern:**  
As defined by QAA:  
Written Examinations = 60%, Practical Examinations = 0%, Coursework = 40%

As used by St Andrews:  
2-hour Written Examination = 60%, Coursework = 40%

**Re-assessment pattern:**  
2-hour Written Examination = 100%

**Module coordinator:** Dr M Papathomas

**Module teaching staff:** Dr M Papathomas
### MT5836 Galois Theory

<table>

</tbody>
</table>

Galois theory is one of the most beautiful areas of mathematics, establishing a remarkable connection between the theory of polynomial equations and their roots and group theory. The subject brings together ideas from the theory of groups and fields in a powerful way, culminating in Galois' fundamental theorem. There are many applications of the work, for example demonstrating that certain ruler and compass constructions are impossible, and that there is no general formula for the solution of quintic equations.

**Programme module type:**
- At least three from MT5821, MT5823 - MT5830, MT5836 and MT5990 compulsory for MMath Pure Mathematics.
- At least 60 credits from MT5751 - MT5753, MT575 - MT5759, MT5802, MT5806, MT5809, MT5810, MT5821, MT5823 - MT5830, MT5836, MT5852, MT5990 and ID5059 compulsory for MMath Mathematics.
- Optional for all other undergraduate programmes in the School.

**Pre-requisite(s):** MT3505 or MT4517

**Anti-requisite(s):** MT5826

**Learning and teaching methods and delivery:**
- **Weekly contact:** 2.5 lectures (weeks 1 - 10) and 10 tutorials/practical classes over semester.
- **Scheduled learning:** 35 hours
- **Guided independent study:** 165 hours

**Assessment pattern:**
- As defined by QAA:
  - Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%
- As used by St Andrews:
  - 2.5-hour Written Examination = 100%

**Re-assessment pattern:**
- 2-hour Written Examination = 100%

<td>9.00 am - 10.00 am Mon (even teaching weeks), Tue, Thu</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module introduces the modern ergodic theory approach to understanding chaotic dynamical systems. Topics include recurrence, consequences of ergodicity, entropy, the structure of the space of invariant measures and unique ergodicity. This will give students an insight into a thriving field of mathematics, which is at the core of the research interests of many faculty in the Pure Division in the School of Mathematics and Statistics.

**Programme module type:** Optional for MMath Mathematics or MMath Pure Mathematics

**Pre-requisite(s):** MT5825

**Learning and teaching methods and delivery:**
- **Weekly contact:** 2.5 lectures (x 10 weeks), 1 tutorial (x 10 weeks)
- **Scheduled learning:** 35 hours
- **Guided independent study:** 165 hours

**Assessment pattern:**
- As defined by QAA:
  - Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%
- As used by St Andrews:
  - 2.5-hour Written Examination = 100%

**Re-assessment pattern:**
- 2.5-hour Written Examination = 100%

**Module coordinator:** Dr M Todd

**Module teaching staff:** Dr M Todd
MT5852 Mathematical Biology 2

| SCOTCAT Credits: | 20 | SCQF Level 11 | Semester: | 1 |
|------------------|----|---------------|-----------|
| Academic year:   | 2017/8 & 2018/9 |
| Planned timetable: | 9.00 am Mon (odd weeks), Wed and Fri |

This module will explore real world applications of mathematics to biological and medical problems e.g. cell movement, pattern formation in animal coat markings, spread of diseases (AIDS, measles). The mathematical techniques used in the modelling will be nonlinear partial differential equations. The module will be useful to students who wish to specialise in Applied Mathematics in their degree programme.

Programme module type: Optional for all undergraduate programmes in the School of Mathematics & Statistics.

Pre-requisite(s): MT3504

Learning and teaching methods and delivery: Weekly contact: 2.5 lectures (weeks 1 - 10) and 1 tutorial (weeks 2 - 11).

Assessment pattern: As defined by QAA: Written Examinations = 100%, Practical Examinations = 0%, Coursework = 0%

As used by St Andrews: 2-hour Written Examination = 90%, Coursework (Class Test) = 10%

Re-assessment pattern: Take-Home Examination = 100%

Module coordinator: Dr T Lorenzi

Module teaching staff: Dr T Lorenzi

MT5990 Independent Study Module

| SCOTCAT Credits: | 20 | SCQF Level 11 | Semester: | 1 or 2 |
|------------------|----|---------------|-----------|
| Academic year:   | 2017/8 & 2018/9 |
| Availability restrictions: | Available only to students on an MMath, MPhys or MSc degree programme in the School |
| Planned timetable: | To be arranged. |

This module provides the opportunity for a student to study an Advanced topic as a reading course under the supervision of a member of staff. The topic will be disjoint from those available in other modules.

Programme module type: At least three from MT5802, MT5806, MT5809, MT5810, MT5852 and MT5990 compulsory for MMath Applied Mathematics.

At least three from MT5821, MT5823 - MT5830, MT5836 and MT5990 compulsory for MMath Pure Mathematics.

At least 60 credits from MT5751 - MT5753, MT5757, MT5758, MT5802, MT5806, MT5809, MT5810, MT5821, MT5823, MT5825, MT5836, MT5852 and MT5990 compulsory for MMath Mathematics.

Optional for MMath Statistics and MPhys Mathematics and Theoretical Physics.

Pre-requisite(s): Permission from the Head of School

Learning and teaching methods and delivery: Weekly contact: Typically 1 hour project supervisions.

| Scheduled learning: | 12 hours | Guided independent study: | 188 hours |

Assessment pattern: As defined by QAA: Written Examinations = 0%, Practical Examinations = 0%, Coursework = 100%

As used by St Andrews: Coursework = 100%

Re-assessment pattern: Resubmission of coursework = 100%

Module coordinator: Dr A L Wilmot-Smith
# MT5991 Professional Skills for Mathematical Scientists

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>30</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>Whole Year</th>
</tr>
</thead>
</table>

### Academic year:
2017/8 & 2018/9

### Availability restrictions:
Available only to students on an MSc Postgraduate programme or, exceptionally, on an MMath or MPhys Honours degree programme in the School

### Planned timetable:
To be arranged.

This module encompasses a range of skills, both generic and topic specific, together with taught components aimed at providing an appreciation of both breadth and depth of research areas in Pure or Applied Mathematics. The precise programme of study, together with the identification of the relevant software expertise required, will be determined in consultation with the student's supervisor.

### Programme module type:
In exceptional circumstances and with the approval of the Head of School, optional for final year of MMath Programme.

### Learning and teaching methods and delivery:
**Weekly contact:** Varies. Typically 1 project supervision per week over whole year.

**Scheduled learning:** 24 hours

**Guided independent study:** 276 hours

### Assessment pattern:
- **As defined by QAA:**
  - Written Examinations = 0%, Practical Examinations = 0%, Coursework = 100%

- **As used by St Andrews:**
  - Coursework = 100%

### Re-assessment pattern:
Resubmission of coursework = 100%

### Module coordinator:
Dr J D Mitchell

# MT5999 Advanced Project in Mathematics / Statistics

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>40</th>
<th>SCQF Level 11</th>
<th>Semester:</th>
<th>Whole Year</th>
</tr>
</thead>
</table>

### Academic year:
2017/8 & 2018/9

### Availability restrictions:
Available only to students in the final year of an MMath or MPhys Honours programme in the School

### Planned timetable:
To be arranged.

This is a more substantial project which, for MMath students, will replace the existing Honours project. The project will be chosen from an approved list of topics. The student will be required to investigate a topic in some depth, submit a report by the end of April and give a presentation.

### Programme module type:

Either MT5999 or PH5102 is compulsory for MPhys Mathematics and Theoretical Physics.

### Pre-requisite(s):
Enter to an MPhys or MMath programme

### Learning and teaching methods and delivery:
**Weekly contact:** Typically and on average, 40 mins of project supervisions per week over whole year

**Scheduled learning:** 16 hours

**Guided independent study:** 384 hours

### Assessment pattern:
- **As defined by QAA:**
  - Written Examinations = 0%, Practical Examinations = 0%, Coursework = 100%

- **As used by St Andrews:**
  - Coursework = 100%; Project = 80%, Presentation = 20%

### Re-assessment pattern:
Resubmission of project = 100%

### Module coordinator:
Prof C E Parnell
