This module provides an introduction to philosophical issues in metaphysics and philosophy of mind. These include questions such as: What is the relation between the mind and the material world? Is the mind a part of the scientific, law-governed material world? If so, can I really act freely? If the mind is part of the material world, how could a material thing be conscious? What, fundamentally, are material things and their properties? What is it for one event to cause another? What is time, and what is change? How can physical objects persist through change? Can a person persist through time and change and still be the same person?

Philosophy has often been said to begin with the question 'how ought we to live?' This module introduces students to fundamental questions and problems in moral philosophy (how should we live? What ought we to do? What is it to be a good human being?) and in political philosophy (how ought we to live together?). In moral philosophy we will look at both applied ethics (exploring particular moral issues, such as our obligations to those in severe need, and our treatment of non-human animals) and normative ethics (exploring theoretical approaches to tackling such issues, for example utilitarian, Kantian and virtue ethics). In political philosophy, we will explore central concepts such as liberty, equality, and democracy, and consider the extent to which we should give up some of our freedom in exchange for the protection of the state.

This module introduces the essential concepts and techniques of critical reasoning, formal propositional logic, and basic predicate logic. Among the central questions are these: what distinguishes an argument from a mere rhetorical ploy? What makes an argument a good one? How can we formally prove that a conclusion follows from some premises? In addressing these questions, we will also cover topics such as argumentative fallacies, ambiguity, argument forms and analyses, induction versus deduction, counterexamples, truth-tables, truth-trees (tableaux), natural deduction, and quantification.
