This module provides a foundation into the study of Earth and environmental sciences. The key elements of the planet will be introduced. The bulk structure of the solid Earth (and the other planets of our solar system), and the dynamic hydrosphere and atmosphere will be covered from planetary to atomistic scales. Practical and transferable skills will be developed in tutorials and laboratory exercises which include the identification of minerals and rocks both in hand specimen and using microscopes. Fieldwork will be introduced as two half-day excursions. University-level study skills associated with this module include working in groups, oral and written presentations, advanced use of the University’s internet and library facilities for data acquisition, and critically assessing scientific data and reports.

Programme module type: Compulsory for BSc Geology, Environmental Earth Science, joint degrees with Biology and Chemistry, and MGeol Earth Sciences

Anti-requisite(s): GG1011 Required for: ES2001

Learning and teaching methods and delivery: Weekly contact: 5 lectures, tutorials and skills sessions, and 1 x 2-hour practical (x 11 weeks); 7-hours fieldwork in total.

Scheduled learning: 84 hours Guided independent study: 116 hours

Assessment pattern: As defined by QAA:
Written Examinations = 50%, Practical Examinations = 30%, Coursework = 20%

As used by St Andrews:
2-hour Written Examination = 50%, 2-hour Practical Examination = 30%, Coursework = 20%

Re-Assessment pattern: 2-hour Written Examination = 80%, Coursework = 20%, No Re-Assessment if Coursework mark is <4

Module Co-ordinator: Dr S Mikhail

Lecturer(s)/Tutor(s): Earth and Environmental Sciences staff
### ES1002 Earth Resources and Environment

<table>

<td>12.00 noon - 1.00 pm Mon - Fri; 2.00 pm - 4.00 pm Thu and Fri</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This module builds on the understanding of planet Earth gained in ES1001, with an underlying theme of the Earth's resources and environment. The processes in action at different tectonic settings (volcanism, metamorphism etc) and the natural hazards induced by these processes leads into Earth resources (metals, hydrocarbons and energy) and the applied nature of Earth Sciences in problem-solving resource and environmental issues. Key skills for Earth and environment scientists are developed and the module includes a 4-day residential field excursion to the northeast of Scotland around Easter.

**ES1801 Field Geology Summer School**

| SCOTCAT Credits: | 24 |
| SCQF Level: | 7 |
| Semester: | 2 |

**Academic year:** 2016/7 & 2017/8

**Availability restrictions:** Available only to non-graduating students.

**Planned timetable:** Mon - Thu, variable hours. Fri dedicated to personal study

This module aims to introduce students to Earth Science in the context of Scottish Geology over a five-week course. Scotland is the ideal natural laboratory for this; it offers classic exposures of a variety of rock types relevant to key periods throughout the three billion-years of Earth History. The taught component of the module includes lectures, practical classes and fieldtrips. Assessment comprises of: exams (multiple choice/short answer questions, an illustrated essay), field notebook presentation, group oral presentations.

**Programme module type:** Summer module for non-graduating students only.

**Pre-requisite(s):** GPA of 3.0 or above (or equivalent)

**Learning and teaching methods and delivery:**

| Weekly contact: Fieldwork, lectures, practical classes full-time over 5 weeks. |
| Scheduled learning: 157 hours | Guided independent study: 83 hours |

**Assessment pattern:**

- **As defined by QAA:**
  - Written Examinations = 40%, Practical Examinations = 0%, Coursework = 60%
- **As used by St Andrews:**
  - MCQ Test = 5%, 2-hour Mid-term Examination = 15%, 2-hour Final Examination = 20%, Coursework = 60%

**Re-Assessment pattern:**

- 2-hour Written Examination = 80%, Coursework = 20%, No Re-Assessment if Coursework mark is <4

**Module Co-ordinator:** Dr W McCarthy

**Lecturer(s)/Tutor(s):** Earth and Environmental Sciences staff
## ES2001 Dynamic Earth: The Earth System

This module reflects an up-to-date approach to understanding of the behaviour of the solid Earth and its interaction with the atmosphere and biosphere and beyond. It will provide detailed training in some of the processes acting at or near the Earth’s surface (for example the dynamics of erosional processes). The evolution of the planet as a whole (including the evolution of life) from magma oceans in the early Earth to the present day will be covered in detail. Practical and theoretical training in geophysical methods for probing the near surface of the Earth will be provided.

### Programme module type:
Compulsory for BSc Geology, Environmental Earth Science, joint degrees with Biology and Chemistry, and MGeol Earth Sciences

### Pre-requisite(s):
ES1001 and ES1002 or equivalent  
**Required for:** ES2002, ES2003

### Learning and teaching methods and delivery:
**Weekly contact:** 5 lectures and 1 x 3-hour laboratory per week, and occasional tutorials; 16 hours fieldwork

<table>
<thead>
<tr>
<th>Scheduled learning:</th>
<th>112 hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Guided independent study:</td>
<td>188 hours</td>

</table>

### Assessment pattern:
**As defined by QAA:**
Written Examinations = 50%, Practical Examinations = 30%, Coursework = 20%

**As used by St Andrews:**
2-hour Written Examination = 50%, 3-hour Practical Examination = 30%, Coursework = 20%

**Re-Assessment pattern:**
2-hour Written Examination = 80%, Coursework = 20%, No Re-Assessment if Coursework mark is <4

### Module Co-ordinator:
Dr T Raub

### Lecturer(s)/Tutor(s):
Earth and Environmental Sciences staff
This module focuses on the geology and geochemistry of the solid Earth and high temperature processes in the Earth's interior. The mineral building blocks of the Earth will be covered in detail, as well as volcanic and metamorphic processes and geodynamics. A key component of this course is the residential field course to central Spain around the time of the Easter vacation, where independent field mapping will be introduced. Undergraduates on the BSc Geology degree must take ES2002, and are strongly encouraged also to take ES2003.
**ES2003 Dynamic Earth: Earth Surface Processes**

<table>
<thead>
<tr>
<th>SCOTCAT Credits:</th>
<th>30</th>
<th>SCQF Level: 8</th>
<th>Semester:</th>
<th>2</th>
</tr>
</thead>
</table>

**Academic year:** 2016/7 & 2017/8

**Planned timetable:** Lecture: 10.00 am - 11.00 am Tue, Thu and 2.00 pm - 3.00 pm Mon. Practical 3.00 pm - 6.00 pm Mon

This module focuses on the low temperature processes that occur in the outer envelopes of the Earth, including land-atmosphere interactions, glacial processes, tectonic geomorphology, geomicrobiology and oceanography. Relationships between physical, chemical and biological processes occurring along Earth’s surface, and their impact on climate, will be explored using case studies. A key component of this course will be fieldwork to sites of environmental interest developing field skills in water/sediment sampling and analysis, and unravelling contaminant flow-patterns.

**Programme module type:** Compulsory for BSc Geology, BSc Environmental Earth Science and MGeol Earth Sciences.

**Pre-requisite(s):** ES2001

**Learning and teaching methods and delivery:** Weekly contact: 3 x 1-hour lectures and 1 x 3-hour laboratory per week; 12 hours of tutorials and 16 hours fieldwork over the semester.

**Scheduled learning:** 94 hours  
**Guided independent study:** 206 hours

**Assessment pattern:**  
As defined by QAA:  
Written Examinations = 50%, Practical Examinations = 0%, Coursework = 50%

As used by St Andrews:  
2-hour Written Examination = 50%, Coursework = 50%

**Re-Assessment pattern:**  
2-hour Written Examination = 80%, Coursework = 20%, No Re-Assessment if Coursework mark is <4

**Module Co-ordinator:** Dr N Allison

**Lecturer(s)/Tutor(s):** Earth and Environmental Sciences staff
## ES2004 Practical and Field Skills for Earth Sciences (Direct Entrants)

</tbody>
</table>

This module is only available to students who have been accepted for direct 2nd year entry to an Earth Science degree programme. It provides basic practical and fieldwork skills that are not taught at secondary school and which characterise University-taught, accredited Earth Science programmes. Students will take part in level 1 practical and field-based exercises, and then apply these skills to the level 2 teaching programme. The students will also attend those aspects of the lecture programme that are not covered in A-level or Higher Geology curricula. The learning in this module will supplement and complement the ES2001, 2002 & 2003 teaching.

### Programme module type:
Compulsory for Direct entrants to Second Year Geology

### Pre-requisite(s):
Direct Second Year acceptance to BSc Geography, BSc Environmental Earth Science or MGeol Earth Science Degrees

### Co-requisite(s):

### Anti-requisite(s):
ES1001, ES1002

### Learning and teaching methods and delivery:
**Weekly contact:** Weekly lectures, practical classes, and fieldwork. Generally 5 hours per week lecture/lab time plus associated field classes.

**Scheduled learning:** 190 hours  
**Guided independent study:** 110 hours

### Assessment pattern:
**As defined by QAA:**
Written Examinations = 0%, Practical Examinations = 50%, Coursework = 50%

**As used by St Andrews:**
Coursework = 100% (made up of Group Work and 2 Field Excursions = 50%, Practical Examinations = 50%)

### Re-Assessment pattern:
2-hour Written Examination = 100%

### Module Co-ordinator:
Dr S Mikhail

### Lecturer(s)/Tutor(s):
Earth and Environmental Sciences staff
