Prof. Jan Bebbington

I work in a number of areas that are connected to sustainable development that are either closely linked to my subject area (social and environmental accounting) or linked to my policy work as the Scottish Chair of the Sustainable Development Commission. Here is a sample of some of the published work in the area and also research grants that have been received or are currently held that support this work.

**Accounting for carbon**

*Grant:* £19,870 in 2010 (with Heather Lovell and Carlos Larrinaga-Gonzales) from the Association of Chartered Certified Accountants.

*Publication from this grant:*

*Current grant in this area:* £28,650 in 2009 (with Nick Barter) from the Chartered Institute of Management Accountants for a project titled “adapting to climate change regimes: a survey of accounting practice”. Work on this project is ongoing.

*Other recent publications in this area:*

**Accounting for sustainable development**

*Grant:* Co-investigator (with colleagues from the Universities of Dundee, Glasgow Caledonian and Loughborough) on EPSRC funded project (number EP/C008030/1) on Metrics, Models and Toolkits for Whole Life Sustainable Urban Development. Total grant value £1,276,306. Project ran from 2004 – 2008.

*Publications from this grant:*

*Other recent publications in this area:*

**Governance for sustainable development**

**Grant:** NZ$ 9.1 million (approximately £3.2 million) as part of a research team (lead by Landcare Research (New Zealand) Ltd) on the subject of “Sustainable Cities and Settlements” from the New Zealand Foundation for Research in Science and Technology (hereafter FRST). My role in this project was to contribute research expertise to modelling and accounting for sustainable development impacts. The project ran from 2002 – 2008.

**Publications from this grant:**

**Current grants in this area:**

£74,720 in 2007 (with Rehema White and Steve Reicher, University of St Andrews) for an ESRC/Scottish Government collaborative PhD (1+3) studentship titled “Communities for Climate Change: An Evaluation”. Work on this project is ongoing.

£25,000 in 2010 (with Hamid van Korten and Rehema White) from the Scottish Universities Insight Institute for a project titled “Designing the transition to sustainability: resourcing community resilience”. Work on this project is ongoing.
