Find out why Mohammad thought a Modern Apprenticeship was the best way forward.
Foundation Apprenticeships

• Two year, work-based learning opportunity for senior-phase school pupils.
• Time out of school at college or with a local employer, and completed alongside National 5s and Highers.
• Foundation Apprenticeships are currently available in eight subjects including, lab skills, civil engineering and software development.
I'm interested in people talking about

Professor Lesley Yellowlees CBE HonFRSC

Professor Mildred Cohn

Professor Saiful Islam CChem FRSC

Helen Sharman CChem HonFRSC

Professor of inorganic chemistry at the

Mildred Cohn's pioneering use of NMR for the study of enzyme reactions led to her receiving the National Medal.

Saiful works on clean energy materials and is passionate about promoting diversity and bringing science to people.

After studying chemistry, Helen embarked on a career that led her from manufacturing chocolate to becoming...
Future Morph...Career opportunities from science and maths...become someone

Description
Future Morph is the Science Council's website for young people, parents and teachers provides information on the wide range of careers from science and maths.

 Audience: Teacher Student Age Group: 11 to Teacher
Coming up........
How you can help……..

We are looking for 2 teachers familiar with the Higher chemistry curriculum who can match the 58 job profiles listed on the chemistry careers information site, A Future in Chemistry to the specific Highers modules/statements. This guide will be made available to teacher’s to use in their classrooms to demonstrate to their students how the chemistry they are being taught links to real jobs in the chemical sciences, and how studying chemistry can open up a wide variety of future careers. We are looking for a content author and a reviewer who will check over the work. This work will be paid and needs to be completed by 30 July.
