PROCEDURE FOR A TRIPPED ELECTRICAL CIRCUIT

If / when an electrical circuit trips and the breaker at the distribution board needs to be reset, it is agreed with the Estates Dept. that, if the Distribution Board is accessible, we can reset the breaker ONCE only. This must only be done by a person with some knowledge / understanding of electrical circuits after checking what might have caused the trip.

If the electrical circuit trips again for any reason, the breaker must not be touched / reset and a request raised for an Estates Electrician to attend.
