Assessment of postgraduate research students

1. Rules for the submission of dissertations / theses / portfolios

1.1 Forms and presentation of masters and doctoral submissions

All dissertations, theses or portfolios submitted for a research degree should meet the requirements set out in the Postgraduate Senate Regulations.

With the exception of submissions by portfolio, single- or multi-authored papers may not be directly reproduced or repeated as a standard chapter, although they may be included as appendices. However, chapters based on published work may be included in a postgraduate research thesis, as long as:

- the relevant publication(s) and collaborations are acknowledged and cited;
- the author of the thesis is the major contributing author of the material that is included in the thesis;
- the material is integrated in to the structure and narrative of the thesis.

1.2 Variation of word limit

The word limits indicated in the Postgraduate Senate Regulations will be strictly observed. The stated word limits include all elements of the thesis or portfolio apart from the bibliography and appendices.

Any exception to the word limit must be presented to the Associate Provost Students for consideration. Reasons for the request should be fully stated, and a letter of support from the principal supervisor must accompany the request.

Theses submitted in excess of the word limit, without prior approval from the Associate Provost Students, will not be accepted for examination.

1.3 Appendices

Appendices may include text or material on which the dissertation or portfolio is a comment such as:

- original sources or texts
- comparative translations
- visual materials
- descriptions of experiments or lab setups
- field notes
- descriptions of participant information and sample surveys
- calculations on which the argument of the thesis is based
- computer code
- logic proofs
- ethical approval documents
- uncleared copyright material which may need to be redacted from the final electronic thesis

Appendices do not count towards the maximum word limit of the thesis and therefore should not be used to house material which is core to the central work of the
thesis. Underpinning research data are not considered to be an appendix for the purpose of this policy.

Underlying data and software which are not essential for understanding and assessing the argument of the thesis but which may support validation of the results must be deposited in the data repository (Pure) for reasons of integrity, transparency and the FAIR principles of good data stewardship.

When one or more appendices are included with a thesis, both the student and supervisor must sign the appropriate declaration confirming that the appendices only contain material in line with the policy above. The Associate Provost Students should be consulted for any questions regarding what can be included in an appendix.

1.4 Variation of format of thesis submission

Where appropriate, research students may apply to the Associate Provost Students for a research thesis to be submitted in a medium other than a bound typescript and/or without a corresponding electronic copy. Reasons for the request should be fully stated, and a letter of support from the principal supervisor must accompany the request.

1.5 Submission of PhD thesis in foreign language

The languages other than English which may normally be permitted for the submission of a PhD are those inextricably associated with a particular academic discipline taught in the University, in which (in addition to the usual scholarly qualities) native or near-native proficiency in the language is expected of PhD graduates. These languages are, at the present time: French, German, Italian, Russian and Spanish.

Submission in a language other than English will be considered for the degree of PhD. It is expected that the thesis for all other research degrees will normally be written in English, even for degrees in the Modern Languages. Only in circumstances where a PhD thesis was written with permission in a foreign language, and was not deemed satisfactory, may a thesis be submitted for a lower degree award in a language other than English.

Special permission to submit the thesis in a language other than English must be sought from the Associate Provost Students, in a reasoned case presented by the school’s Director of Postgraduate Studies, accompanied by written statements by the candidate and the supervisor. The reasoning should normally refer to the following points, as a minimum:

- confirmation that the candidate is enrolled for doctoral study in the School of Modern Languages, and that the request has the support of the school;
- an evaluation of the candidate’s competence to complete the thesis in the language proposed;
- confirmation that the thesis will contain very substantial references to cultural material (film, text, speech, etc) generated in the language of study;
• confirmation that submission in the language of study will enhance the international accessibility of the research to other scholars within the discipline of study as a whole;
• confirmation of the availability of appropriately qualified supervisors and internal/external examiners.

The following will apply:

• No argument will be accepted that is based on a candidate’s relative inability to write in English.
• Permission must be sought as early as possible and at all events by the end of the first year of study.
• Permission to change languages will not normally be granted after more than one year of full-time study.
• In addition to the thesis itself, a thesis written in a language other than English must be accompanied by a summary of 2,000 to 3,000 words in English as well as the usual 300-word abstract.
• The oral part of the examination will be conducted in English, and the candidate must demonstrate an ability to hold a linguistically accurate discussion of the research in an appropriately academic register.
• In addition to the title in a language other than English, the thesis must bear an English translation of the title. Both titles will appear in all official documentation.
• External examiners will be notified of the language of the thesis before they are appointed.
• The linguistic accuracy, stylistic qualities and scholarly presentation of a thesis in a language other than English will be judged in the same way as they would be in English.
• None of the above points should hinder co-tutelle arrangements in any faculty which stipulate that a thesis may be submitted in the language of a partner institution.

1.6 Submission of thesis and electronic publication of theses

Due to travel and work restrictions in place due to the Coronavirus crisis, during the Academic Year 2020/21, and until further notice, research students (excluding MSc(Res) and MSt(Res) students) will submit their thesis electronically through Moodle. This applies both to the submission of copies for examination (including resubmission following corrections) and submission of final copies to the library. Please see Electronic thesis submission during Covid-19 outbreak for further information.

MSc(Res) and MSt(Res) students will submit their final thesis electronically via MMS. The School may require additional paper copies but there is no requirement to submit a print copy centrally. MSc(Res) and MSt(Res) students are not required to submit a final copy of their thesis to the Library.

It is the University’s intention to support the appropriate dissemination of research material by electronic means. Supervisors and students should therefore think
carefully about the copyright and intellectual property consequences of their work from the outset, and the Library and GRADskills will offer advice and training. The copyright of a thesis normally belongs to the author but students must still complete their declarations via MySaint.

At the point of the submission of a thesis for examination, the candidate and supervisor must fill in the section of the declaration (see additional guidance) which relates to embargoes of work where publication would have commercial, professional, legal or ethical consequences. Embargoes of all or part of the print and/or electronic copy of the thesis must be accompanied by a brief justification. The standard maximum embargo period is five years in the first instance.

2. Examination of Research students students

2.1 Nature of assessment

Theses, dissertations and portfolios submitted for any research degree are to be assessed in accordance with the relevant Postgraduate Senate Regulations.

2.2 Use of videoconferencing in the Viva

For the Academic Year 2020/21, and the duration of the consequences of the Coronavirus crisis, remote examinations will be the norm and do not require special approval from the Associate Provost Students. As restrictions ease, the student and internal examiner can choose to meet in person, with only the external examiner joining remotely, provided that physical distancing requirements are observed.

The convenor must ensure that the examination is conducted in accordance with the guidance given in Use of videoconferencing in a Viva.

2.3 Examining committees and their operation: research degrees

i. The appointment of the Examining Committees

When appointing an examining committee for a postgraduate research degree, the relevant Head of School, after consultation with supervisors, must nominate an examination committee at least 6 weeks prior to submission of the thesis. If the committee has not been nominated by the School and agreed by the Associate Provost Students by the time the thesis is submitted, there may be delays in the examination process. Nomination forms for an Examination Committee should be signed either by the Head of School or by the Director of Postgraduate Studies under the authority of the Head of School. Candidates should be given the opportunity to comment on the composition of the examination committee. Candidates do not have a right of veto, but may appeal to the Associate Provost Students if there is no resolution of a dispute at school level.

The Committee should consist of at least two examiners:

- An internal examiner who is a permanent member of staff of the University. The internal examiner will normally also act as the convener.
- An external examiner
In some situations, such as when two external examiners are appointed, a separate convener may be nominated to ensure that all processes and regulations are observed.

The following applies to the appointment of external examiners:

- Only persons of seniority and experience who are able to command authority in the relevant field of study should be appointed. Appointees should normally hold, or have recently held, an academic appointment in a University.
  - In certain circumstances, however, it may be appropriate to appoint from outside the higher education system, e.g. from industry or the professions, or from the higher education systems of other countries.
- There should be no significant conflicts of interest in the appointment, such as any on-going joint research between the external examiner and supervisor or student.
- If the external examiner is resident abroad, the school should explicitly state, as part of the nomination and approval process, that it is willing to pay the cost of travel to St Andrews if the examiner plans to attend in person.
- Former St Andrews members of staff or research students should not be invited to become external examiners before at least four years have elapsed.
- Members of other Universities who are part of pooling arrangements which relate to the candidate’s area of study may not normally act as external examiners.
- Academic staff from Edinburgh and Stirling Universities who are part of the EastChem pool and SASP (St Andrews and Stirling Graduate Programme in Philosophy) may act as internal examiners for PhD students in St Andrews.

The following applies to the appointment of internal examiners and conveners:

- Conveners of examination committees should be academic or academic related members of staff of the University who will not be retiring or departing the University up to six months after the expected date of submission. In some cases, e.g. if a member of staff knowledgeable in the subject area is not available, two external examiners should be appointed with an internal convener to administer the examination process.
- Conveners are responsible for arranging the date of the oral examination and informing Registry and the school's Director of Postgraduate Studies. The convener is responsible for assuring that the oral examination takes place in an appropriate setting, that the candidate is given the opportunity to answer reasonable questions, and that on conclusion all appropriate forms are completed.
- For the MD (by research thesis), the examining committee shall be a convener and two external examiners. Where a member of university staff is submitting for any higher degree by thesis or dissertation the examining committee should contain two external examiners and an internal examiner who should act as convener.
- A supervisor may not be appointed to an examination committee and is not permitted to attend the oral examination even as an observer.
• As an internal examiner, the convener should be sufficiently distant from the candidate and supervisor, both academically and personally, to ensure an impartial and objective opinion of the thesis. It is accepted, however, that in small departments there will inevitably have been some academic interaction between the convener and candidate.

The purpose of the oral examination is to:

• ensure the candidate’s authorship of the thesis;
• discuss points arising from the examiners’ reading;
• discuss the wider context of the candidate’s specific area of research;
• clarify areas of uncertainty or doubt.

The University expects work at postgraduate research level to be scholarly, substantial, significant and lucid.

ii. Procedures followed by the examining committee

The principal supervisor should inform the examining committee of any special circumstances that may have affected the student’s performance during the period of study.

The examination of a thesis should normally be completed within three months of the date of submission. If the examining committee is unable to convene within three months, then the Associate Provost Students may either authorise a short extension or advise that a new committee should be appointed.

In appropriate circumstances, the oral examination may be held by video conferencing. In these instances, the examining committee must adhere to the guidelines on the use of videoconferencing in a viva.

Examiners are expected to prepare independent written reports on the thesis prior to the oral examination, and they should express a provisional judgement on the thesis in these reports. If academic misconduct is suspected then the Good Academic Practice Policy should be followed.

Examiner’s reports should be submitted at least five working days before the oral examination to Registry, which will make them available to the convener of the examining committee only when all reports have been received. In order to maintain independence, examiners should not confer with one another about the thesis or their judgements prior to all reports having been submitted. These reports will remain confidential unless requested as part of a freedom of information request or appeal.

iii. The Recommendations of the examining committee

After examination, the examining committee may make a recommendation from the relevant options set out in the Postgraduate Senate Regulations.

The examiners may tell the candidate their recommendation informally during or after the oral examination, but the candidate will be notified officially of the result of the examination only after the Associate Provost Students has approved the recommendation of the examining committee.
The examiners must prepare an agreed final report which will be made available by
the convener to the candidate within two weeks of the examination regardless of the
result, containing any recommendations for changes before resubmission, reasons
for referral, and commentary on the future direction of successful theses.

The award of a lower degree for the PhD / DLang / EngD/DEng may only be made
where the examiners are convinced that the thesis fulfils completely the
requirements for that degree, and may not be recommended purely as a
compensatory award.

In the case of a thesis which is either rejected or recommended for a lower degree,
the convener of the examining committee must provide the candidate with a detailed
written statement of the reasons why the thesis has not been accepted for the
original degree.

If there are minor revisions to be made to the thesis, these will be conveyed to the
candidate in writing by the convener. Note that the supervisor’s role does not end
after the examination and that the supervisor should offer guidance to the candidate
on achieving the required revisions. The revised thesis should then be examined by
the internal examiner within two weeks of receipt of the revised thesis. The convener
is responsible for reporting to Registry via MySaint that the corrections or revisions
have been successfully completed.

Where the thesis is more seriously flawed and the examining committee has
recommended a resubmission for the same degree after major revision, the
candidate will obtain a clear and detailed statement in writing of the aspects of the
thesis requiring amendment from the convener. Students who are required to revise
and resubmit the thesis will be permitted an increased maximum word limit of 35,000
for Masters by Research degrees, 45,000 for Taught MPhils and MFAs, 70,000 for
MPhils by research, and 90,000 words for doctoral degrees. In such cases, the
supervisor continues to have an important role after the examination. The supervisor
should offer guidance to the candidate, in consultation with the convener or, where
necessary, the other members of the examining committee, on achieving the
required changes.

When the examiners have recommended that the degree should be awarded, an
electronic copy of the final thesis must be deposited in the University Library before
the student is able to graduate.

A candidate who is dissatisfied with the result of an examination has the right of
appeal and details of the appeals procedure can be obtained from the Senate/Court
Office, see the policies on Student Academic Appeals and Academic Complaints.

2.4 Examination for MSc(Res) and MSt(Res) students

The thesis for a Master of Science by Research or Master of Studies by Research
degree should be submitted electronically, although the School reserves the right to
request print copies in addition. Each thesis will be examined by at least two internal
examiners as assigned by the School. The examination of a thesis should normally
be completed within three months of the date of submission. The examiners will
jointly agree an outcome from the options set out in the Postgraduate Senate Regulations. In most cases an oral examination will not be required, although the examiners may request that an oral examination take place if they deem it necessary. All outcomes will be moderated by an external examiner.
