

Plant-capture estimation of the size of a homogeneous population

by I.B.J. Goudie, P.E Jupp and J. Ashbridge

Biometrika **94**, 243–248. (2007).

Erratum

Line 6 up on page 246 should be

$$\Sigma = \begin{pmatrix} \frac{p^*}{1-p^*} & \frac{t}{1-p} \\ \frac{t}{1-p} & \frac{t}{p(1-p)} \end{pmatrix}^{-1} = \frac{1}{d} \begin{pmatrix} 1 & -p \\ -p & \frac{pp^*(1-p)}{t(1-p^*)} \end{pmatrix}.$$

Thus, in the off-diagonal elements of the middle matrix ‘ p^* ’ should be ‘ p ’.
